X.

X, the twenty-fourth letter of the English alphabet, is borrowed, as to its form, from the Greek Χ. At the end of words, it has the sound of *ks*, as in *wax*, *lax*; in the middle, the sound of *ks*, or sometimes of *gz*, as in *axis*, *example*, *exhaust*. At the beginning of a word, it has the sound of *z*. See *Principles of Pronunciation*, § 104.

☞ Before the employment by the Greeks of their character Ξ or ξ, it was their common custom to represent this sound by Χ Σ rather than by Κ Σ. The Romans copied this Greek practice, and we consequently find in Latin inscriptions such forms as MAXSVMVS PROVSVMVS, &c. But the Romans being generally averse to the aspirated letters, had little or no occasion for the character X, except in this combination with an S. The very sight, therefore, of an X even before the eye came to the S, raised in the mind the idea of a sibilant, and thus rendered the sibilant itself a superfluous letter, which, because it was superfluous was before long omitted, and the single letter X made to perform the office of the two consonants X S. *Ling Cyc.*

APPENDIX TO WEBSTER'S DICTIONARY.

THE remarks prefixed to most of the Vocabularies constituting the present Appendix contain so full an account of their scope, and of the principles on which they have been constructed, that little remains to be said in this place. The general design has been to extend the range of the Dictionary by giving, as far as seemed desirable and practicable, the pronunciation, or the pronunciation and explanation, of proper names, both ancient and modern, and by adding several useful tables appropriate to the work as a popular manual of reference.

The "Explanatory and Pronouncing Vocabulary of the Names of Noted Fictitious Persons, Places, etc.," might, with propriety, have been entitled a *Select* Vocabulary, for the limits to which the author was necessarily restricted have compelled him to omit many names whose claim to insertion seemed doubtful. But the selection given has been made with great care, and will, it is thought, prove sufficient for the ordinary wants of the general reader. If, however, it should be found that some names worthy of notice have been omitted, it is to be remembered that many are explained, and that completeness, in a work of this kind, though an object to be aimed at, is one that can never be attained. Whatever may be its deficiencies, it is hoped that the Vocabulary will be found worthy of the public favor, and that it may go far toward supplying an acknowledged want.

The "Pronouncing Vocabulary of Greek and Latin Proper Names" has been prepared by Professor Thomas A. Thacher, of Yale College. It is an enlargement and thorough revision of that which Professor Thacher prepared for the edition of 1847, and is based upon Walker's "Key," but with omissions and corrections so numerous as to make it, in fact, a new and independent work. It contains *classical* names only, and its plan is such as to show, to a very large extent, the authority for their *classical* pronunciation. This pronunciation is indicated by the place of the accent, by the forms of the syllables which the accent determines, and by occasional references to preliminary rules. To attempt to indicate to an English ear the *quality* of the sounds of the vowels by marks which, in classical usage, are employed to show their *quantity*, would tend to produce confusion, and could hardly fail to be especially disadvantageous to students of the Latin and Greek languages. The rules which precede the Vocabulary are designed to assist the inquirer in settling those questions of pronunciation which are not answered in the Vocabulary itself. These rules do not disagree with those given by Walker, and, in connection with the Vocabulary, will guide to that pronunciation which is in vogue at the University of Oxford and in other learned schools. It has not been thought necessary or desirable to repeat the list by giving a Terminational Vocabulary, as Walker and others have done. Neither has it been deemed expedient to present the forms of Greek names used by Grote and some other authors. The system which these writers have adopted aims at a more exact representation of the Greek orthography than the commonly received method, but it has not been consistently carried out by its advocates, and seems destined to make little impression upon the long-established usage of the English language.

The "Pronouncing Vocabulary of Scripture Proper Names" is believed to be more complete than any that has yet been given to the public. The first part is intended to contain every proper name occurring in the Common or "Authorized" Version of the Bible, including the Apocrypha. It also contains several Hebrew words which are not proper names, but which, being found in the English Bible, and not occurring in the body of the Dictionary, need to have their pronunciation indicated for the mere English reader. To these are added a few names, as *Elohim*, *Gadara*, *Gehenna*, *Morians*, &c., which are not found in the English Bible, but which, for various reasons, have been thought worthy of insertion. The second part contains a selection of names from the Douay Bible, or Anglo-Catholic Version of the Scriptures. In preparing the lists of names, and in settling the pronunciation, the following works have been consulted; viz., Labbe's "Catholici Indices" (London, 1751); Oliver's "Scripture Lexicon" (Oxford, 1810); Walker's "Key to the Classical Pronunciation of Greek, Latin, and Scripture Proper Names" (Philadelphia, 1808); Taylor's Calmet's "Biblical Dictionary" (Am. ed., Boston, 1832); Carr's "Classical Pronunciation of Proper Names" (London, 1842); Jones's "Proper Names of the Old Testament

Scriptures Expounded and Illustrated" (London, 1856); "The Englishman's Greek Concordance of the New Testament" (New York, 1859), Smith's "Dictionary of the Bible" (London, 1864); and the Scripture Vocabularies contained in the Dictionaries of Perry, Knowles, Smart, Worcester, and Ogilvie.* For the proper names in the Apocrypha, the books themselves in this collection have been carefully examined. A similar course has been pursued in regard to the names contained in the Douay Bible. Particular attention has been paid to the orthography; and, in all cases of doubt, the original editions of both versions have been diligently collated with the best modern editions, in order to insure as great a degree of accuracy as possible.

The pronunciation of Modern Geographical and Biographical Names has been attended to by Dr. Joseph Thomas, of Philadelphia, the author of the system of pronunciation in Lippincott's "Gazetteer of the World." His aim has been to exhibit the pronunciation of such modern proper names, — including those of distinguished living persons, — together with such names of eminent mediæval characters, as, from their foreign, unusual, or irregular spelling, might occasion perplexity in reading or public speaking. The account of the Elements of Pronunciation of the Principal Modern Languages of Continental Europe has been very carefully prepared, and will be found sufficiently comprehensive and complete for the purposes of those for whom it is more especially designed. The system of notation employed is that used in the body of the Dictionary, with additional signs for foreign sounds; and it serves, in most cases, to exhibit the pronunciation with precision, and, in all other cases, with such an approximation to the true sound as, in English discourse, is practically preferable to a minute and idiomatic accuracy.

As an appropriate accompaniment to these two vocabularies, there are given an "Etymological Vocabulary of Geographical Names" and a list of "Common English Christian Names, with their Pronunciation, and their Equivalents in Several Other Languages," which, it is thought, will prove both interesting and instructive to those who have occasion to consult them.

The Table of "Quotations, Words, Phrases, &c., from the Greek, the Latin, and Modern Foreign Languages," has received careful revision and many important additions. The three parts, or alphabets, into which, in former editions, it was distributed, have been blended into one for the greater convenience of the consulter. In its present improved form, it is believed to be as complete and satisfactory as any within the reach of the public.

The Table of "Abbreviations" given in former editions of the Dictionary has been thoroughly revised and greatly enlarged, and, for general use, it now forms one of the most extensive lists of the kind to be found in any work of reference in the language.

The Table of "Arbitrary Signs" has been very much improved by the addition of many new characters, and by the explanation of such as originally possessed a significance other than that conventionally assigned to them. With the single exception of the symbols originally used to distinguish the asteroids, no notice has been taken of signs which have become obsolete, as those used in Doomsday Book and by astrologers and the older chemists. Full lists of these may be found in Crabb's "Universal Technological Dictionary," Savage's "Dictionary of the Art of Printing," Johnson's "Typographia," and other like works.

The repetition in a classified arrangement, at the end of the book, of the wood-cuts distributed through it, and the addition of numerous larger engravings that could not be introduced into the main vocabulary, give to the work an enhanced value, which, it is believed, will be generally recognized and appreciated.

AS PEOPLE READ NOTHING IN THESE DAYS THAT IS MORE THAN FORTY-EIGHT HOURS OLD, I AM DAILY ADMONISHED THAT ALLUSIONS, THE MOST OBVIOUS, TO ANY THING IN THE REAR OF OUR OWN TIME NEED EXPLANATION — DE QUINCEY

PREFACE.

An attempt is here made to meet a want which has long been felt by readers of every class. In view of this want, so widely experienced and so generally acknowledged, it is indeed surprising that no similar work has hitherto made its appearance, at least in our own language. This very fact has made the preparation of the present Vocabulary a task of great difficulty, as it has required an amount of general and special reading, and an extent of research in certain directions, which might have been materially lessened, had there been earlier laborers in the field. This fact, too, must serve as an apology — if any is needed — for whatever omissions the critical reader may discover. Many names are doubtless wanting which ought to have a place in a complete work, but it may still be said that nowhere else can such a variety and amount of information on the same class of subjects be found in a collective form.

An objection may be made by some, that, however useful and important such a glossary may be, it does not form an appropriate accompaniment to a general dictionary of the English language. But the same objection would apply with equal force to each and all of the Vocabularies in the Appendix to the present work, and it is a sufficient answer to say, that experience has shown, that information of the nature which they convey is more naturally looked for in a general dictionary than in any other kind of book.

The main design of this Vocabulary is to explain, as far as practicable, the allusions which occur in modern standard literature to the names of noted fictitious persons and places. For this reason, the plan is almost exclusively restricted to proper names, or such as designate individual persons, places, or things. The introduction of appellative or generic names, such as *abbot of unreason*, *lord of misrule*, *lobold*, *undine*, &c., as well as the explanation of celebrated customs and phrases, such as *flap-dragon*, *nine-men's-morrice*, *Hobson's choice*, *philosophy of the Porch*, *to send to Coventry*, *to carry coals to Newcastle*, &c., would open too vast a field of inquiry, and, besides, there are copious special treatises on these subjects already before the public, as those of Brand, Hone, Pulleyn, Timbs, and others. Many names and phrases of this class will be found explained in the preceding Dictionary. The names of the Greek, Roman, Norse, and Hindoo Mythologies are for the most part excluded on like grounds. The exceptions admitted are a few names, such as *Alastor*, *Comus*, *Laodamia*, &c., which are chiefly known to the general reader from their adoption into English literature. From the Rabbinical and the Mohammedan Mythology have been taken some names, which are occasionally made the subject of reference, and concerning which information is not readily obtainable. Prominence has been given to the departments of Angelology, Demonology, Fairy Mythology, and Popular Superstitions, which afford many of the most important names in Fiction. Parables, Allegories, Proverbs, and Mediæval Legends have also furnished a considerable number. Ecclesiastical History contributes the names of several pseudo saints, and other imaginary personages. In the Drama, and in Poetry, — including the various kinds, Epic, Romantic, Narrative, Comic, &c., — the intention has been to give the names of all such characters as are familiarly referred to by writers and speakers at the present day, and, though accidental omissions may have occurred, it is hoped that under this head the Vocabulary will be found reasonably complete. The principal deficiency is most likely to exist in the department of Prose Romance, for, while there is very little that is fictitious in ancient literature which is not included in Mythology, — a subject not here treated, — yet the field of research continually widens as we come down to modern times, until it seems to be almost boundless. In fixing the necessary limitations of the work, the consideration which has determined the admission or rejection of names has not been the intrinsic merit of a book, or the reputation of the writer, but the hold which his characters have taken upon the popular mind. There are many authors of acknowledged genius, and hundreds of clever and prolific writers, who yet have not produced a single character which has so fallen in with the humor, or impressed itself upon the fancy, of the time, as to have become the subject of frequent allusion. The English romancers and novelists whose creations are most familiarly known and most firmly established are Bunyan, De Foe, Swift, Richardson, Fielding, Smollett, Sterne, Goldsmith, Scott, Dickens, and Thackeray. Many of the portraitures of these writers may be safely presumed to be of more than temporary interest and importance. In regard to other and subordinate characters, from whatever source derived, it is to be borne in mind that a dictionary is chiefly designed for the use of the existing generation. To what extent names of secondary importance should be included is a question which it has been difficult to determine. Opinions from scholars entitled to the highest consideration have been about equally divided upon this point. Some have favored a selected list of the most important names only; others, and the greater number, have recommended a much

wider scope. A middle course is the one which has been actually followed. It is evident that many articles which may seem to one person of questionable importance, will be held by another to be of special value as throwing light upon passages which to him would otherwise be perplexing or obscure.

The Vocabulary is, of course, chiefly designed to elucidate the works of British and American writers, but names occurring in the literatures of other modern nations have been introduced wherever they have become well known to the public through the medium of translations, or when they seemed, for other reasons, to be worthy of insertion

In accordance with the plan of the Vocabulary as indicated in the title, such English, French, German, and other Pseudonyms as are frequently met with in books and newspapers have been given for the benefit of the general reader No pretense, however, is made to completeness, or even to fullness, in this respect The bibliographer will find here little or nothing that is new to him, and he must still have recourse to his Barbier, Querard, and Weller, and other writers of the same class Names like *Erasmus*, *Melanchthon*, *Mercator*, *Œcolampadius*, &c, assumed by learned men after the revival of classical literature, being, in general, merely the Latin or Greek equivalents of their real names, and being also the only names by which they are now known in history, are excluded as not germane to the work For a similar reason, no notice is taken of such names as *Masséna*, *Metastasio*, *Philidor*, *Psalmanazar*, *Voltaire*, &c

Many eminent characters in political and literary history are often known and referred to by surnames and sobriquets or nicknames which they have borne, as, the *Master of Sentences*, the *Scourge of God*, the *Stagirite*, the *Wizard of the North*, the *Little Corporal*, &c "Nicknames," said Napoleon, "should never be despised it is by such means mankind are governed" The Vocabulary embraces the more important of these, but names like *Caligula*, *Barbarossa*, *Tintoretto*, &c, which have entirely superseded the real names of the persons designated by them, have not been regarded as properly coming within the purview of the present undertaking Nor has it, as a rule, been thought advisable to admit simple epithets, such as *the Bold*, *the Good*, *the Great*, *the Unready*, *the Courtier*, &c, the omission of which can hardly be considered a defect, since their signification and the reason of their imposition are usually too obvious to excite inquiry This rule, however, has not been uniformly observed Here, as elsewhere in the Vocabulary, that discretionary power has been freely exercised, to which every author of a dictionary or glossary is fairly entitled, and which he is often compelled to use

A considerable space has been allotted to familiar names of Parties, Sects, Laws, and Battles, to poetical and popular names of Seas, Countries, States, Cities, &c, to ancient geographical names which have become interesting from their revival in poetry or otherwise, and to certain long-established and important Personifications In general, nicknames of Parties and Sects, such as *Methodists*, *Shakers*, &c, which have been adopted by those to whom they were at first derisively applied, or which have passed into history and common use as their peculiar and appropriate names, are not designedly included In a majority of cases, they are given in the body of the Dictionary Most of the historical by-names inserted, such as *Day of Dupes*, *Evil May day*, *Wonderful Parliament*, *Omnibus Bill*, *Western Reserve*, &c, are those which are not to be found under the proper heads in Encyclopedias and other books of reference Popular designations connected with American History and Geography have been freely given in all cases where they have seemed to be well settled, and fitted to illustrate past or contemporary events or characters

A slight departure from the strict limits of the plan has been thought allowable in the case of a few *quasi* historical, or real but obscure, persons, places, and things, such as *John O'Groat*, *Mrs Glasse*, the *Minerva Press*, &c, which are often referred to in literature or conversation, and of which no account can be obtained except through an amount of research and toil impracticable to most readers.

In conformity with the course elsewhere pursued in this Dictionary, illustrative citations have been given when it seemed expedient.

In the explanation of names, statements borrowed in great part from one author have been diligently collated with other statements derived from independent and often widely separated sources, and they have been freely enlarged, abridged, or otherwise modified, according to the necessity of the case, or as would best subserve the purpose of the work On the other hand, where the information required has been found already stated in the best way, no hesitation has been felt in adopting the exact language of a writer; and, beyond this general explanation, no acknowledgment of indebtedness seems necessary

To determine the pronunciation of proper names is unquestionably the most difficult requirement of Orthoepy, and little or no attention has hitherto been paid to the pronunciation of such as are peculiar to the literature of fiction In the absence, not merely of a trustworthy guide, but of any guide at all, the author may sometimes have gone astray, but he has been careful to avail himself of all the information he could obtain In particular, he has made a thorough examination of such of our vernacular poets as are esteemed classics, and has occasionally adduced passages from their writings to show the accentuation adopted by these "best judges of pronunciation," as Walker styles them, or, more rarely, to show the sound they assign to particular letters or syllables If the decisions or opinions he has given prove, in general, to be well grounded, the credit will not be wholly due to him, since he has enjoyed the advice and assistance of gentlemen whose superior opportunities of becoming acquainted with the best usage both at home and abroad, and whose critical taste and familiarity with all that pertains to the subject of orthoepy, afford the assurance that they "speak scholarly and wisely" In regard to the notation, the system followed in the case of English names is the same as that used in the Dictionary proper, and in the case of names from other modern languages, it is the same as that used in the Pronouncing Geographical and Biographical Vocabularies appended to the Dictionary (For further explanations, see pp xxxix and 1631)

In the preparation of this Vocabulary, works of general literature have been examined as extensively and thoroughly as time and opportunity have rendered possible In addition, use has been made of a large number of works devoted to the various branches of literary history, and valuable assistance has been derived from the principal Reviews, and the published writings of the best essayists Not a few noteworthy names and facts have been gleaned from Encyclopedias, Biographical Dictionaries, Gazetteers, and other works of reference, which have been systematically searched for this purpose These sources of information are altogether too numerous to be particularized in this place, while to specify a few and make no mention of others of equal importance, would be an invidious distinction

In conclusion, the author would return his sincere thanks to the many friends who have contributed in different ways to the completeness and accuracy of his Vocabulary Conscious that the successful accomplishment of his task, in its full extent, and on a first attempt, is more than could be reasonably expected of any individual, he asks a candid criticism of his labors and corrections or suggestions from any quarter, — especially suggestions of additional names, accompanied with explanations, references, or citations, — if sent to him through the publishers, will be gratefully received, and adopted, if possible, in a future edition.

☞ "*Bomba* is the name of children's play in Italy, a kind of prisoner's-base, or what used formerly to be called, in England, King by your leave, and there was probably an allusion to this pastime in the nickname, especially as his majesty was fond of playing the king, and had a predilection for childish amusements besides, and for playing at soldiers But the name, whatever its first cause, or its collective significance, is understood to have derived its greatest weight from a charge made against his majesty of having called upon his soldiers to 'bombard his people during one of their insurrections 'Bombard em! bombard em!' he is said to have cried out; that is to say, 'Sweep them away—cannonade em!' His apologist, Mr Macfarlane, not only denies the charge, but says his cry was the very reverse, to wit, 'Spare my misguided people! Make prisoners, do not kill make prisoners!' The book entitled 'Naples and King Ferdinand' repeats the charge, however in the strongest manner It says that he kept crying out, 'Down with them! down with them!' adding, in a note, what was stated to be the particular expression, 'Bombardate, and hence, says the author, 'arose his well-known sobriquet of *Bomba* *Leigh Hunt*

☞ "The name *Bomba* is often misinterpreted as having some allusion to bombardments It is not so In Italy, when you tell a man a thing which he knows to be false or when he wishes to convey to you the idea of the utter worthlessness of any thing or person, he puffs out his cheek like a bagpipers in full blow, smites it with his forefinger, and allows the pent breath to explode, with the exclamation, 'Bomb-a' I have witnessed the gesture, and heard the sound Hence, after 1849, when regal oaths in the name of the Most Holy Trinity were found to be as worthless as a beggar's in the name of Bacchus or the Madonna, when Ferdinand was perceived to be a worthless liar, his quick-witted people whispered his name He was called King Bomba, King Puff-cheek, King Liar, King Knave The name and his character were then so much in harmony that it spread widely, and they have been so much in harmony ever since, that he has retained it till now, and will retain it, I suppose, till he is bundled into his unhonored grave"

☞ The two kings are represented as walking hand in hand, as dancing together, as singing in concert, and, generally, as living on terms of the greatest intimacy and affection There seems to have been no particular reason for making them kings of Brentford rather than of any other place Bayes says (a 1, sc 1), "Look you, sirs, the chief hinge of this play is, that I suppose two kings of the same place, as, for example, at Brentford, for I love to write familiarly" Colonel Henry

☞ "One would think that, in personifying itself a nation would be apt to picture something grand, heroic and imposing but it is characteristic of the peculiar humor of the English, and of their love for what is blunt comic, and familiar, that they have embodied their national oddities in the figure of a sturdy, corpulent old fellow, with a three-cornered hat, red waistcoat, leather breeches, and stout, oaken cudgel Thus they have taken a singular delight in exhibiting their most private foibles in a laughable point of view, and have been so successful in their delineation, that there is scarcely a being in actual existence more absolutely present to the public mind than that eccentric personage, *John Bull*" *W Irving*

☞ "It is strange that Milton should have pronounced the word *Cambuscan*, nor is it pleasant, when his robust line must be resounding in the ear of every one to whom the story is called to mind, to be forced to obey even the greater dictation of the original, and throw the accent as undoubtedly it ought to be thrown, on the first and last syllable On no theory, as respects Chaucer's versification, does it appear intelligible how Milton could have thrown the accent on the second syllable when the other reading stares us in the face throughout Chaucer's poem" *Leigh Hunt*

Addison has, however, gained himself immortal honor by the manner of filling up the last character. Who is there that can forget, or be insensible to, the inimitable mixture of lofty generosity and whimsical peculiarity, of high breeding and various traits of nature and of old English character in it — to his unpretending virtues and amiable weaknesses — to his modesty, generosity, hospitality and eccentric whims — to the respect of his neighbors and the affection of his domestics — to his wayward hopeless, secret passion for his fair enemy the widow in which there is more of real romance and true delicacy than in a thousand tales of knight-errantry — (we perceive the hectic flush of his cheek, the faltering of his tongue, in speaking of her bewitchings, and wilfulness of her hand) — to the havoc he makes among the game in his neighborhood — to his speech from the bench, to show the 'Spectator' what is thought of him in the country — to his unwillingness to be put up as a sign post, and his having his own likeness turned into the Saracen's head — to his gentle reproof of the bargain of a gypsy that tells him 'he has a widow in his line of life' — to his doubts as to the existence of witchcraft and protection of reputed witches — to his account of the family pictures, and his choice of a chaplain — to his falling asleep at church, and his reproof of John Williams, as soon as he recovered from his nap, for talking in sermon-time." *Hazlitt*

☞ "What would *Sir Roger de Coverley* be without his follies and his charming little humorisms? If the good knight did not fall out to the people sleeping in Church, and say 'Amen' with such a delightful pomposity, if he did not make a speech in the assize-court *apropos des bottes*, and merely to show his dignity to Mr. Spectator, if he did not mistake Madam Doll Tearsheet for a lady of quality in Temple Garden, if he were wiser than he is, if he had not his humor to salt his life and were but a mere English gentleman and game preserver, — of what worth were he to us? We love him for his vanities as much as his virtues. What is ridiculous is delightful in him, we are so fond of him because we laugh at him so." *Thackeray*

His head was small and flat at top, with huge ears, large green glassy eyes and long, snipe nose, so that it looked like a weathercock perched upon his spindle neck to tell which way the wind blew. To see him stride along the profile of a hill on a windy day with his clothes bagging and fluttering about him one might have mistaken him for the genius of famine descending upon the earth, or some scarecrow eloped from a cornfield." *Irving*

Crapaud, Johnny (krȧ'pō') A sportive designation of a Frenchman, or of the French nation collectively considered. The following account has been given of the origin of this name —

> 'Les anes au *crapaud* prendront Sara'
> (The ancient toads shall Sara take.)

This line was then applied to this event in every conceivable manner. *Sarah* but backwards. By *the ancient toads* we mean the French, as that nation formerly had for an armorial bearings three or five toads instead of the three flowers de luce which it now bears." *Seward Breedon*

Crĭs'pin-Crăt'i line A nickname fastened by Marie on upon D'Espremesnil, in ridicule of his consequence. He seems to have thought the name of Catiline alone too respectable, and therefore prefixed that of Crispin, which probably alludes to a comedy in one act, published in 1707 by Le Sage, and called "Crispin the Rival of his Master." The story turns on the tricks of Crispin to gain the affections of his master's mistress.

He was an excellent seaman — brave, active, friendly in his way, and scrupulously honest, but as little acquainted with the world as a suckling child, whimsical, impatient, and so impetuous that he could not help breaking in upon the conversation whatever it might be, with repeated interruptions, that seemed to burst from him by involuntary impulse. ☞ Some of these persons had by chance, been published together for a while at Florence where they put forth a volume of rhymes under the title of The Florence Miscellany Afterward they, and a number of other persons their admirers and imitators, began to publish their effusions in England, chiefly in two daily newspapers called "The World" and "The Oracle," from which they were soon collected, and with vast laudation, recommended to the public attention in a volume entitled "The Album" by Bell, the printer An end was at length put to these animadversions by the appearance, in 1794, of Gifford's "Baviad," which, in 1796 was followed by its continuation the "Maviad," — both powerful and extremely popular satires, which lashed the Della Crusca authors with merciless, but deserved severity One of the founders of this school of poetry Mr Robert Merry wrote under the signature of *Della Crusca* and this name was given to the whole brood of rhymesters to which he belonged probably because he became the most noted of them Merry had travelled for some years on the Continent and had made a long residence in Florence, where he was elected a member of the celebrated Academy *Della Crusca* — that is, Academy of the Sieve, — which was founded for the purpose of purifying and refining the Italian language and style In adopting the name of this Academy as a *nom de plume* Merry may not only have alluded to the fact of his membership but very possibly intended to intimate that what he should write would be very exquisite and free from chaff It would appear that Merry was not the first of the writers whose incubrations came out in "The Oracle" and "The World," for, says Gifford, "While the epidemic malady was spreading from fool to fool, *Della Crusca* came over [from Italy] and immediately announced himself by a sonnet to Love Anna Matilda wrote an incomparable piece of nonsense in praise of it and the two 'great luminaries of the age' as Mr Bell calls them fell desperately in love with each other From that period not a day passed without an amatory epistle fraught with lightning and thunder *et quæquid habent telorum armamentaria cœli* The fever turned to frenzy Laura, Maria Carlos Orlando, Adelaide and a thousand other nameless names, caught the infection, and from one end of the kingdom to the other, all was nonsense and Della Crusca Other writers of this school, besides Merry whose names have been preserved are Mr Bertie Greathead, a man of property and good family, Mr William Parsons another gentleman of fortune, Mr Edward Jerningham ("The Bard") author of numerous plays and poems Miles Peter Andrews a writer of prologues and epilogues Mr Edward Topham, the proprietor of "The World," the boy Charles Lee ("Morosoph Lee" as Gifford calls him) principal editor of that paper Mr Joseph Weston, a small magazine-critic of the day, James Cobbe a now-forgotten farce-writer, Frederic Pilon, did to have been a player by profession, a Mr Timothy or Thomas Adney (who wrote under the anagram of 'Mit Yenda' or 'Mot Yenda'), Mr Thomas Vaughan ('Edwin'), Mr John Williams ('Tony, or Anthony Pasquin'), the celebrated James Boswell, who had not yet established his reputation as the prince of biographers, and the dramatists Cobb, Morton Reynolds, Holcroft Sheridan, and the Younger Colman, who survived and recovered from their discreditable connection with the Della Cruscan folly Of the female writers of this school, the principal names are those of Mrs Piozzi the widow of Johnson's friend Thrale but at that time the wife of her daughter's music-master Mrs H Cowley ('Anna Matilda') the clever authoress of the "Belle's Stratagem," and the somewhat notorious Mrs Robinson, who, with all her levity intellectual as well as moral, was not altogether without literary talent and poetical feeling

Lazar and *Dives* lived in diversely,

Dixie An imaginary place somewhere in the Southern States of America, celebrated in a popular negro melody as a perfect paradise of luxurious ease and enjoyment The term is often used as a collective designation of the Southern States A correspondent of the "New Orleans Delta" has given the following account of the original and early application of the name —

☞ I do not wish to spoil a pretty illusion, but the real truth is, that DIXIE is an indigenous northern negro refrain, as common to the writer as the lamp-posts in New York city seventy or seventy-five years ago It was one of the every-day allusions of boys at that time in all their out-door sports And no one ever heard of Dixie's land being other than Manhattan Island until recently when it has been erroneously supposed to refer to the South from its connection with pathetic negro allegory When slavery existed in New York, one 'Dixy' owned a large tract of land on Manhattan Island, and a large number of slaves The increase of the slaves, and the increase of the abolition sentiment, caused an emigration of the slaves to more thorough and secure slave sections and the negroes who were thus sent off (many being born there) naturally looked back to their old homes, where they had lived in clover, with feelings of regret, as they could not imagine any place like Dixy's Hence it became synonymous with an ideal locality, combining ease, comfort, and material happiness of every description In those days, negro singing and minstrelsy were in their infancy, and any subject that could be wrought into a ballad was eagerly picked up This was the case with 'Dixie' It originated in New York, and assumed the proportions of a song there In its travels it has been enlarged and has 'gathered moss' It has picked up a 'note' here and there A 'chorus' has been added to it, and, from an indistinct chant of two or three notes, it has become an elaborate melody But the fact that it is not a southern song 'can not be rubbed out' The fallacy is so popular to the contrary, that I have thus been at pains to state the real origin of it

Don Jūˈan A mythical personage who figures largely in drama, melodrama, and romance, as the type of refined libertinism

☞ There are two legends connected with the name both of Spanish origin, but in course of time the two have become so blended together, that they can not easily be separated Don Juan Tenorio of Seville whose life has been placed in the 14th century, is the supposed original of the story The traditions concerning him were long current in Seville in moral form and were afterwards dramatized by Gabriel Tellez (Tirso de Molina) He is said to have attempted the seduction of the daughter of the governor of Seville or of a nobleman of the family of the Ulloas Her father detects the design, and is killed in a duel which ensues A statue of the murdered man having been erected in the family tomb, Don Juan forces his way into the vault and invites the statue to a feast which he had caused to be prepared The stony guest makes his appearance at table, is invited to the great amazement of Don Juan whom he compels to follow him and delivers over to hell The legend in its earliest known form involved the same supernatural features, the ghostly apparition the final reprobation and condemnation to hell which have in general characterized the modern treatment of the subject From the Spanish the story was translated by the Italian playwrights thence it passed into France where it was adopted and brought upon the stage by Molière and Corneille In Italy Goldoni made it the basis of a play The first instance of a musical treatment of the subject was by Gluck in his ballet of Don Juan about the year 1760 Afterward Mozart immortalized the tradition in his great opera Don Giovanni which first appeared at Vienna in 1787 The name has been rendered most familiar to English readers by the use which Byron has made of it in his poem entitled Don Juan Put the dash, dashes, features of the old legend the chief which separate Don Juan from the multitude of villain libertines Byron has omitted and he can hardly be said to have done more than borrow the name of the hero

Don Quĭxˈote [Sp *Don Quijote* or *Don Quixote* dōn ke hō'tā] The hero of a celebrated Spanish romance of the same name, by Cervantes Don Quixote is represented as "a grave country gentleman of La Mancha, full of genuine Castilian honor and enthusiasm gentle and dignified in his character, trusted by his friends, and loved by his dependents," but "so completely crazed by long reading the most famous books of chivalry that he believes them to be true, and feels himself called on to become the impossible knight errant they describe, and actually goes forth into the world to defend the oppressed and avenge the injured, like the heroes of his romances"

☞ To complete his chivalrous equipment — which he had begun by fitting up for himself a suit of armor since the beginning of the century — he took an esquire out of his neighborhood a middle aged peasant, ignorant and credulous to excess, but of great good nature, gluttony and a little selfishness and yet sincerely attached to his master, shrewd enough occasionally to see the folly of their position, but always amusing, and sometimes mischievous in his interpretations of it These two sallied forth from their native village in search of adventures of which the excited imagination of the knight, turning windmills into giants, solitary inns into castles and galley-slaves into oppressed gentlemen, finds abundance wherever he goes while the esquire translates them all into the plain prose of truth with an admirable simplicity, quite unconscious of its own humor and rendered the more striking by its contrast with the lofty and courteous dignity and magnificent illusions of the superior personage There could of course, be but one consistent termination of adventures like these The knight and his esquire suffer a series of ridiculous discomfitures and are at last brought home like madmen to their native village where Cervantes leaves them with an intimation that the story of their adventures is by no means ended In a continuation, or Second Part published in 1615, the Don is exhibited in another series of adventures, equally amusing with those in the First Part, and is finally restored, "through a severe illness to his right mind made to renounce all the follies of knight errantry and die, like a peaceful Christian, in his own bed" *Ticknor*

☞ "Some say his surname was Quixada, or Quisada (for authors differ in this particular) However, we may reasonably conjecture he was called Quixada, that is, lantern jaws Having seriously pondered the matter eight whole days he at length determined to call himself Don Quixote Whence the author of this most authentic history draws the inference that his right name was Quixada, and not Quisada, as others obstinately pretend" *Quixote* means literally a cuish, or piece of armor for the thigh Cervantes calls his hero by the name of this piece of armor because the syllable *ote*, with which it ends generally terminates words in the Spanish language which have a ridiculous meaning

☞ In this character Shakespeare is thought to have ridiculed Sir John Fastolfe, an English general of the time of Henry VI, who had part of the command before Orleans, in France and at the village of Patay, set the example of an inglorious flight before Joan of Arc causing great destruction of his men, for which cowardice he was degraded from his rank as a knight of the Garter The opinion that Shakespeare intended to caricature this personage has been very generally received Fuller, the church historian says, 'Nor is our comedian excusable by some alteration of his name, writing him Sir John *Falstaffe*, and making him the property and pleasure of King Henry V to abuse seeing the vicinity of sounds [both] intrench on the memory of that worthy knight Shakespeare introduces the historical *Fastolfe* in The First Part of Henry VI and represents his conduct at Patay and his subsequent degradation with historical accuracy But recent commentators deny that he was the original of the 'valiant Jack Falstaff' of Shakespeare's other plays and treat the supposition as a gross absurdity In the first draught of 'King Henry IV' Sir John Falstaff was called *Sir John Oldcastle* a name borne by a distinguished Wycliffite who was born under Edward III and put to death in the fourth year of Henry V The change in the patronymic is attributed to remonstrances on the part of Oldcastle's descendants That Shakespeare was desirous to do away with any impression that Falstaff and Oldcastle were one and the same person, under different names appears from the Epilogue to The Second Part of King Henry IV in which after promising that the play shall be continued with Sir John in it he says, 'Our humble limner is ashamed to draw him more, lest Oldcastle died a martyr *and this not the man*'

☞ The mythical Faust dates from the period of the Reformation The numerous legends connected with the name all refer to a certain Dr Faustus, reputed to be a celebrated magician and necromancer, and often confounded with Johann Faust, or Faust the chief promoter of the art of printing It has been by many strenuously maintained that no such person ever existed, and that the name has been unfairly imputed to some magician (*ob tam tum in rebus paractu difficilibus successum*) As long ago as the 16th century two books were written with the purpose of proving the historical nonentity of Dr Faustus Modern criticism, however, leaves little room for doubting that there was a real person of this name, and that he lived somewhere near the end of the 15th and the beginning of the 16th centuries Faustus occupies the same place in reference to the popular superstitions of Germany that the enchanter Merlin does to those of England that Don Juan holds in Spain Robert of Normandy in France and Virgil in Italy The Gothic Faust is the highest form which the tradition has attained

☞ "The story recounts how when he had been exposed to great dangers from wild beasts, and was in a state of starvation he suddenly beheld a beautiful lady standing by his side, with a bandage over her eyes, leaning upon a wheel, and looking as if she were going to speak The lady did not wait long before she addressed him in these words "Know, young man, that my name is Fortune I have power to bestow wisdom strength riches, health, beauty, and long life One of these I am willing to bestow on you Choose for yourself which it shall be" Fortunatus immediately answered "Good Lady I wish to have riches in such plenty that I may never again know what it is to be so hungry as I now find myself" The lady then gave him a purse, and told him that in all the countries where he might happen to be, he need only put his hand into the purse as often as he pleased, and he would be sure to find it full pieces of gold, that the purse should never fail of yielding the same sum as long as it should be kept by himself and children" The sultan led Fortunatus to a room almost filled with jewels opened a large closet and took out a cap which he said was of greater value than all the rest Fortunatus thought the sultan was joking, and told him he had seen many better caps than that Ah, said the latter "that is because you cannot know its virtue Whoever puts this cap on his head and wishes to be in any part of the world will find himself there in a moment The story has a moral ending, inasmuch as the possession of this inexhaustible purse and wishing-cap are the cause of ruin to Fortunatus and his sons The subject has been dramatized by Hans Sachs in 1553 in England by Thomas Dekker in his "Pleasant Comedie of Old Fortunatus" (1600) and again in modern times it has been poetically treated by Ludwig Tieck in his Phantasus (1816)

☞ The allusion to the "three wise men of *Gotham*" who "went to sea in a bowl" is very obvious The *Gotham* here referred to is a parish in Nottinghamshire England, which has long been celebrated — like the Phrygia of the Asiatics, the Abdera of the Thracians and the Peonia of the Greeks — for the remarkable stupidity of its inhabitants They are said to have heard the cuckoo upon a certain occasion but never having seen her hedged the bush from which the note proceeded A bush is still shown there called the "cuckoo bush" Fullers says, "The proverb of 'as wise as a man of Gotham' passeth publicly for the periphrasis of a fool, and a hundred fopperies are forged and fathered on the townsfolk of Gotham Wharton speaking of the idle pranks of the men of Gotham observes, that "such pranks bore a reference to some customary laws tenures belonging to that place or its neighborhood now grown obsolete" Hearne, in allusion to this subject, also remarks, 'Nor is there more reason to esteem 'The Merry Tales of the Mad Men of Gotham, (which were much valued and cried up in the time of Henry VIII, though now sold at ballad-singers stall) as altogether romance, a certain skillful person having told me, more than once, that they formerly held lands there by such customs as are touched upon in this book" The book is that noticed by Walpole — "The Merry Tales of the Mad Men of Gotham a book extremely admired, and often reprinted in that age written by Lucas de Heere, a Flemish painter, who resided in England at the time of Elizabeth" Wood however, tells us that the tales were written by one Andrew Borde, or Andreas Perforatus, as he calls himself, a sort of traveling quack, from whom the name and occupation of the "Merry Andrew" are said to be derived There is an ancient black-letter edition of it in the Bodleian Library at Oxford, called "Certeine Merry Tales of the Mad Men of Gotham, compiled in the reign of Henry VIII, by Dr Andrew Borde, an eminent physician of that period" Another derivation of the phrase given in Thoroton's "Nottinghamshire," is that when King John, in one of his 'progresses,' was about to pass through Gotham toward Nottingham, he was prevented by the inhabitants, who thought that the ground over which a king passed became forever after a public road The king was naturally incensed at this incivility, and sent some persons to punish the inhabitants, who bethought themselves of an expedient for avoiding the king's wrath The messengers, on their arrival, found all the people engaged in some foolish occupation or other, so that they returned to the court, and reported that Gotham was a village of fools

☞ 'The critics have been greatly divided in regard to Shakespeare's intention in this tragedy and character Coleridge thinks that Shakespeare's purpose was "to exhibit a character living from the sense of reality and seeking a refuge from the pressure of its duties in that ideal activity the overbalance of which with the consequent indecision of position is Hamlet's disease" Hazlitt says, "It is not a character marked by strength of passion or will but by refinement of thought and feeling His ruling passion is to think, not to act and any vague pretense that flatters this propensity instantly diverts him from his previous purposes In White's view Hamlet is a man of contemplation who is ever diverted from his purposed deeds by speculation upon their probable consequences or their past causes unless he acts too quickly and under too much excitement for any reflection to present itself Goethe thought that Shakespeare designed to exhibit 'a lovely pure noble, and most moral nature without the strength of nerve which forms a hero sinking beneath a burden which it can not bear, and must not cast away According to Schlegel the whole [play] is intended to show that to deliberation consideration which exhausts all the relations and possible consequences of a deed, must cripple the power of action

☞ "Childe Harold may not be nor do we believe he is Lord Byron's very self, but he is Lord Byron's picture sketched by Lord Byron himself, arrayed in a Turkish dress, and disguised perhaps by some extrinsic attributes but still bearing sufficient resemblance to the original to warrant the conclusion that we have drawn W Scott

2 The heroine of Shakespeare's "All's Well that Ends Well," in love with Bertram

☞ There was never, perhaps a more beautiful picture of a woman's love cherished in secret, not self-consuming in silent languishment, not pining in thought, not passive and desponding over its idol, but patient and hopeful strong, in its own intensity, and sustained by its own fond faith The situation of Helena is the most painful and degrading in which a woman can be placed She is poor and lowly, she loves a man [Bertram] who is far her superior in rank, who repays her love with indifference, and rejects her hand with scorn She marries him against his will, he leaves her, with contempt on the day of their marriage, and makes his return to her arms depend on conditions apparently impossible All the circumstances and details with which Helena is surrounded are shocking to our feelings, and wounding to our delicacy, and yet the beauty of the character is made to triumph over all' *Mrs Jameson*

Fastened and fixed the shame on't in himself,
Threw off his spirit appetite, and sleep,
And downright languished'

She swoons away with grief, and her supposed death concludes the third act The two first acts are occupied with the adventures of her daughter Perdita, and with the restoration of Perdita to the arms of her mother and the reconciliation of Hermione and Leontes the piece concludes Such in few words is the dramatic situation The character of Hermione exhibits what is never found in the other sex but rarely in our own — yet sometimes — dignity without pride love without passion, and tenderness without weakness *Mrs Jameson*

☞ According to a writer in "Notes and Queries (xvi 146), "There is a tradition in Somersetshire that the Abbot of Glastonbury, hearing that Henry VIII had spoken with indignation of his building such a kitchen as the king could not burn down, — it being domed over with stone, — sent up his steward Jack Horner, to present the king with an acceptable dish viz, a dish, which, when the crust was lifted up, was found to contain deeds transferring twelve manors to his sovereign, and that, as Jack Horner traveled up to town in the abbot's wagon, he lifted up the crust and stole out the gift of the manor of Wells still possessed by his descendants, and, when he returned told the abbot that the king had given it to him but was found or suspected, to have imposed upon his patron Hence the satire vented under the nursery lines, —

"Little *Jack Horner*
Sat in a corner [viz, that of the wagon]
Eating his Christmas pie
He put in his thumb,
And pulled out a plum [the deed of the manor of Wells]
And said, "What a brave boy am I!"

Another correspondent of the same work (xvii 85) gives a different version of this story "When the monasteries and their property were seized, orders were given that the title-deeds of the abbey estates at Wells which were very extensive and valuable, and partly consisted of a sumptuous grange built by abbot John Selwood should be given up to the commissioners After some delay it was determined by the Abbot of Glastonbury to give them up, and for want of a safe mode of conveyance, them it was decided that the most likely to avoid their being seized by any but those for whom they were intended was to send them in a pasty, which should be forwarded as a present to one of the commissioners in London The safest messenger, and least likely to excite suspicion was considered to be a lad named *Jack Horner*, who was a son of poor parents living in the neighborhood of the grange The lad set out on his journey on foot laden with the pasty It was a very long road and Jack had not being so thickly inhabited as now, he sat down to rest in passing a corner where he could find by the wayside Hunger too overcame him and he was at a loss what to do when he bethought himself that there would be no harm in tasting, even so little of the pasty which he was carrying He therefore inserted his thumb under the crust when to his there was nothing, but parchments Whether that allayed his hunger then or not, I can not say, but although he could not read or understand these parchments, yet he thought they might be valuable He therefore took one of the parchments and pocketed it and pursued his journey with the rest of his pasty Upon his delivering his parcel, it was perceived that one of the chief deeds (the deeds of the Wells Abbey estates) was missing, and as it was thought that the abbot had withheld it, an order was straightway sent for his execution But the sequel was, that, after the monasteries were despoiled there was found in the possession of the family of Jack Horner a piece of parchment which was in fact the title deed of Wells Abbey and lands, and that was 'the plum which little Jack Horner had unwittingly become possessed of the abbot Whitings was executed for withholding, the deeds This is the tale as told to me

Jewkes, Mrs (jūks) A hateful character in Richardson's "Pamela"

Jew, The Wandering. An imaginary personage, who owes his existence to a legend connected with the history of Christ's passion As the Savior was on the way to the place of execution, overcome with the weight of the cross, he wished to rest on a stone before the house of a Jew, whom the story calls Ahasuerus, who drove him away with curses Jesus calmly replied, "Thou shalt wander on the earth till I return" The astonished Jew did not come to himself till the crowd had passed, and the streets were empty Driven by fear and remorse, he has since wandered, according to the command of the Lord, from place to place, and has never yet been able to find a grave According to another account, he was Pontius Pilate's porter, and his original name was Cartaphilus Soon after the Savior's crucifixion, he became converted, and took the name of *Joseph* At the end of every hundred years, he falls into a fit or trance, upon which, when he recovers, he returns to the

same state of youth he was in when our Savior suffered, being about thirty years of age. In the 14th century, he was called *Isaac Laketon*, but the chronicles of that time make no mention of these periodical alternations of youth and age, though they still impute to him perpetual life

☞ Roger of Wendover, a monk of St Albans (d 1237) and Matthew Paris (d 1259), a Benedictine monk of the Congregation of Clugny, and likewise of the monastery of St Albans, give us the oldest traditions of the Wandering Jew The Teutonic legend seems to have had a different origin from the English According to Menzel (History of German Poetry), the whole tradition is but an allegory, the Wandering Jew symbolizing heathenism In Germany, the tradition of the Wandering Jew became connected with John Beltadæus, a real personage The story of this Jew was printed in 1602, and frequently afterward He is said to have been seen at Antwerp in the 13th century, again in the 15th, and a third time in the 16th, with every appearance of age and decrepitude Southey, in his poem of the 'Curse of Kehama,' and Croly, in his romance entitled "Salathiel," trace the course of the Wandering Jew, but in violation of the entire legend, and Eugene Sue adopted the name as the title of one of his most popular and most immoral novels ('Le Juif Errant'), though the Jew scarcely figures at all in the work

☞ "Ahasuerus is the antitype of Faust He shuns life, and seeks deliverance from its pains, while Faust seeks to embrace the moment" *Grdvse, Trans*

Jin'gle, Mr Alfred An impudent, swindling stroller, in Dickens's "Pickwick Papers" He is represented as never speaking a connected sentence, but stringing together mere disjointed phrases, generally without verbs

Jōan, Pope. A supposed individual of the female sex, who is placed by several chroniclers in the series of popes between Leo IV and Benedict III, about 853–855, under the name of *John* The subject of this scandalous story is said to have been a young Englishwoman, who left her home in man's disguise, with her lover, a very learned man, and went to Athens, where she made great progress in profane law, afterward she went to Rome, where she became equally proficient in sacred learning, for which her reputation became so great that, at the death of Leo, she was unanimously elected as his successor, under the general belief of her male sex She, however, became pregnant, and one day, as she was proceeding to the Lateran Basilica, she was seized with the pains of child labor, on the road between the Colosseum and the church of St Clement, and there she died, and was buried without any honors, after a pontificate of two years, five months, and four days The first to mention this detestable piece of scandal was Marianus Scotus a monk of the abbey of Fulda, who died at Mainz in 1086 but the story is given more circumstantially in the "Lives of the Popes," written by Martinus Polonus, a Cistercian monk, and confessor to Gregory X "Until the Reformation," says Gibbon, "the tale was repeated and believed without offence" Its refutation is due to the learned Protestant, David Blondel There is an ancient miracle play upon this subject, in German, entitled "The Canonization of Pope Joan, 1480," which was widely diffused, and which did much to shake the popular reverence for the Papal See

Jockey of Norfolk An epithet conferred upon Sir John, son of Sir Robert Howard, a close adherent to the house of York, and remarkable alike for the magnificence of his estate and for the high offices which he held In 1470, he was summoned to Parliament by the title of Lord Howard, was made commander in chief of all the king's naval forces for resisting the Lancastrians, then rallying under the Earl of Warwick and the Duke of Clarence, and, in the following year, he was constituted deputy governor of Calais and the marches adjacent He did not, however, long enjoy these advantages, for the next year he accompanied his master, Richard III, to the field of Bosworth, and, notwithstanding the celebrated and friendly warning which was posted on his tent during the night before the battle, of

> "*Jockey of Norfolk*, be not too bold
> For Dickon, thy master is bought and sold"

he entered into the fight, and paid the penalty of his fidelity with his life, being one of the slain on that well contested day

Jones, Tom The hero of Fielding's novel entitled "The History of a Foundling," — represented as a model of generosity, openness, and manly spirit, mingled with thoughtless dissipation

☞ "I can not say that I think Mr Jones a virtuous character, I can not say but that I think Fielding's evident liking and admiration for Mr Jones show that the great humorist's moral sense was blunted by his life, and that here in art and ethics there is a great error A hero with a flawed reputation, a hero sponging for a guinea, a hero who can not pay his landlady, and is obliged to let his honor out to hire, is absurd, and his claim to heroic rank untenable." *Thackeray*

King Arthur A famous king of Britain, supposed to have flourished at the time of the Saxon invasion, and to have died at Glastonbury, in the year 542, from wounds received on the fatal battle field of Camlan His true history has been overlaid with so many absurd fictions by the monkish chroniclers and mediæval poets and romancers, that many have erroneously regarded him as altogether a mythical personage The usual residence of King Arthur was said to be at Carleon, on the Usk, in Wales where, with his beautiful wife Guinever, he lived in splendid state, surrounded by hundreds of knights and beautiful ladies, who served as patterns of valor breeding, and grace to all the world From his court, knights went out to all countries, to protect women, chastise oppressors, liberate the enchanted, enchain giants and malicious dwarfs, and engage in other chivalrous adventures A popular tradition of belief was long entertained among the Britons that Arthur was not dead, but had been carried off to be healed of his wounds in Fairy Land, and that he would reappear to avenge his countrymen, and reinstate them in the sovereignty of Britain See EXCALIBAR, GORLOIS, GUINIVERE, IGERNA, MODRED, RON, ROUND TABLE, UTHER

King Cotton A popular personification of the great staple production of the Southern States of the American Union The supremacy of cotton seems to have been first asserted by the Hon James H Hammond, of South Carolina, in a speech delivered by him in the Senate of the United States, on the 4th of March, 1858, from which the following is an extract —

"No you dare not make war upon cotton No power on earth dares to make war upon it *Cotton is king* Until lately the Bank of England was king, but she tried to put her screws as usual, the fall before the last, on the

cotton crop, and was utterly vanquished The last power has been conquered Who can doubt, that has looked at recent events, that cotton is supreme' '

King Log A character in a celebrated fable of *Æsop*, which relates that the frogs, grown weary of living without government, petitioned Jupiter for a king, and that, in response to their request he threw down a log among them for their ruler The fable adds that the frogs, though at first terrified by the sudden appearance of their king, on becoming familiarized to his presence, and learning his true character, experienced a complete change of feeling, their dread being turned into the utmost contempt They therefore entreated Jupiter for another king, whereupon he sent them a stork,—or, as some say, a serpent,—who immediately began to devour them with unappeasable voracity Finding that neither their liberty, property, nor lives were secure under such a ruler, they sent yet once more to Jupiter for another king but instead of giving them one, he returned this answer merely "They that will not be contented when they are well, must be patient when things go amiss"

☞ "The author who is now before us [Southey] belongs to a sect of poets that has established itself in the country within these ten or twelve years and is looked upon we believe, as one of its chief champions and apostles The peculiar doctrines of this sect it would not, perhaps be very easy to explain, but that they are *dissenters* from the established systems in poetry and criticism is admitted, and proved, indeed, by the whole tenor of their compositions' "The productions of this school can not be better characterized than by an enumeration of the sources from which their material have been derived The greatest part of them we apprehend, will be found to be composed of the following elements 1 The anti social principles and distempered sensibility of Rousseau, his discontent with the present constitution of society, his paradoxical morality, and his perpetual hankerings after some unattainable state of voluptuous virtue and perfection 2 The simplicity and energy (*horresco referens*) of Kotzebue and Schiller 3 The homeliness and harshness of some of Cowper's language and versification, interchanged occasionally with the *naïveté* of Ambrose Philips, or the quaintness of Quarles and Dr Donne From the diligent study of these few originals, we have no doubt that an entire art of poetry may be collected, by the assistance of which the very *gentlest* of our readers may soon be qualified to compose a poem as correctly versified as Thalaba, and to deal out sentiment and description with all the sweetness of Lamb, and all the magnificence of Coleridge" *Ed Rev*, vol i

☞ "When, some years ago, a gentleman [Mr Jeffrey], the chief writer and conductor of a celebrated review [the Edinburgh], distinguished by its hostility to Mr Southey, spent a day or two at Keswick [Mr Southey's place of residence], he was circumstantially informed by what series of accidents it had happened that Mr Wordsworth, Mr Southey, and I had become neighbors, and how utterly groundless was the supposition that we considered ourselves as belonging to any common school but that of good sense, confirmed by the long-established models of the best times of Greece, Rome, Italy, and England, and still more groundless the notion that Mr Southey (for, as to myself, I have published so little, and that little of so little importance, as to make it almost indecorous to mention my name at all) could have been concerned in the formation of a poetic sect with Mr Wordsworth, when so many of his works had been published, not only previously to any acquaintance between them, but before Mr Wordsworth himself had written any thing but in a diction ornate and uniformly sustained, when, too, the slightest examination will make it evident that between those and the after-writings of Mr Southey there exists no other difference than that of a progressive degree of excellence, from progressive development of power, and progressive facility from habit and increase of experience Yet, among the first articles which this man wrote after his return from Keswick, we were characterized as 'the school of whining, and hypochondriacal poets that haunt the Lakes'" *Coleridge*

Mac bĕth', Lady The chief female character in Shakspeare's tragedy of "Macbeth"

☞ In the mind of *Lady Macbeth* ambition is represented as the ruling motive in intense overmastering passion, which is gratified at the expense of every mistaken and generous principle and every feminine feeling In the pursuit of her object she is cruel treacherous and daring She is doubly guilty she dies in guilt and blood, but the murder she instigates is rendered more hideous by disloyalty and ingratitude, and by the violation of all the most sacred claims of kindred and hospitality When her husband's more kindly nature shrinks from the perpetration of the deed of horror she, like an evil genius whispers him on to his damnation Lady Macbeth's amazing power of intellect her tremendous determination of purpose her superhuman strength of nerve, render her as fearful in herself as her deed is fearful, yet she is not a mere monster of depravity with whom we have nothing in common nor a creature whose destructive path we watch in mere affright and amaze She is a terrible impersonation of evil passions in their lofty power, never so far removed from our own nature as to be cast beyond the pale of our sympathies for the woman herself is human, even up to the last still linked with her sex and with humanity *Mrs Jameson*

☞ Maid Marian, as Queen of May has a golden crown upon her head, and in her left hand a red pink as an emblem of summer Percy and Steevens agree in making Marian the mistress of Robin Hood Douce, however,

Was sovereign of the woods, chief lady of the game;
Her clothes tucked to the knee, and dainty-braided hair,
With bow and quiver armed *Drayton*

Very soon had her fame traveled abroad, for in 1432 the play of 'Robin et Marion' was performed by the students of Angers one of them appearing as a *fillette déguisée*, the origin of *Marionettes*, puppets disguised to play the part of Maid Marion, is thus explained" *Longe*

☞ "*Malvolio* is not essentially ludicrous He becomes comic but by accident He is cold, austere, repelling but dignified, consistent, and, for what appears, rather of an overstretched morality He is opposed to the proper *ludicrous* of the piece, and falls in the unequal contest Still his pride, or his gravity (call it which you will), is inherent, and native to the man, not mock or affected, which latter only are the fit objects to excite laughter His quality is at the best, unlovely, but neither buffoon nor contemptible His dialect, on all occasions, is that of a gentleman and a man of education We must not confound him with the eternal, old low steward of comedy He is master of the household to a great princess, a dignity, probably conferred upon him for other respects than age or length of service" *C Lamb*

Mambrino (măm-bree'no) A Moorish king, in the romantic poems of Bojardo and Ariosto, who was the possessor of an enchanted golden helmet, which rendered the wearer invulnerable, and which was the object of eager quest to the Paladins of Charlemagne This helmet was borne away by the knight Rinaldo It owes its celebrity in a great measure, to the mention which is made of it by Cervantes, in "Don Quixote"

Were always downward bent, admiring more
The riches of heaven's pavement, trodden gold,
Than aught divine or holy else enjoyed

Man in the Moon A name popularly given to the dark lines and spots upon the surface of the moon which are visible to the naked eye, and which when examined with a good telescope, are discovered to be the shadows of lunar mountains It is one of the most popular, and perhaps one of the most ancient, superstitions in the world, that these lines and spots are the figure of a man leaning on a fork, on which he carries a bundle of thorns or brushwood, for stealing which on a Sunday he was confined in the moon (See MIDSUMMER NIGHT'S DREAM, A iii, sc 1, and TEMPEST, A ii, sc 2) The account given in Numbers xv 32, *et seq*, of a man who was stoned to death for gathering sticks upon the Sabbath day, is undoubtedly the origin of this belief.

☞ To have a care "lest the chorle may fall out of the moon" appears from Chaucer's Troilus and Cressida to have been a proverbial expression in his time In the 'Testament of Cressida,' describing the moon, he informs us that she had

On her breat a chorle painted ful even
Bearing a bush of thornes on his backe
Which for his theft might climb no nerer the heven"

With the Italians, Cain appears to have been the offender Dante in the twentieth canto of the 'Inferno,' describes the moon by the periphrasis 'Colui che pone' The Jews have some Talmudical story that Jacob is in the moon, and they believe that his face is visible For Oriental and other traditions, see Grimm, 'Deutsche Mythologie,' p 679

☞ "As for the forms of those spots, some of the vulgar think they represent *a man* and the poets guess 'tis *the boy Endymion*, whose company she loves so well that she carries him with her, others will have it only to be the face of a man, as the moon is usually pictured but Albertus thinks rather that it represents *a lion*, with his tail toward the east and his head to the west, and some others (Eusebius, Nicenus Hist lib viii c xv) have thought it to be very much like *a fox*, and certainly it is as much like a lion as that in the zodiac, or as Ursa Major is like a bear' *Bp Wilkins, Disc of a New World*

Man of Blood. An expression which occurs in the Old Testament (2 Sam xvi. 7), in a marginal note explanatory of the context, and which refers in that place to King David. The application of the term to any man of violence is naturally suggested, and it would seem to have been employed by the Puritans in reference to Charles I.

Departed merit claims a reverent tear *Coleridge*

☞ "Goethe is the only dramatic poet who has succeeded in giving to a simple, uncultured girl from the lower ranks of life a poetic interest Gretchen is a perfect union of homely nature and poetic beauty She says not a word that might not have been uttered by any girl of her class in any town in Germany, and yet—such is the exquisite art of the author—she acquires in our estimation an ideal import, and registers herself in the memory as one of the most remarkable portraits in the rich wide gallery of dramatic art" *Christian Examiner*

They go travelling on, and meet with various adventures At last, one morning, Morgante, to play him a trick, draws off Margutte's boots while he is asleep, and hides them Margutte looks for them, and at length perceives an ape, who is putting them on and drawing them off The sight of the animal thus engaged so tickles Margutte's fancy that he laughs till he bursts

Mask, The Iron, or The Man with the Iron Mask A name used to designate an unknown French prisoner, whose identity has never been satisfactorily established He was carried, about the year 1679, with the greatest secrecy, to the castle of Pignerol, of which Saint Mars was governor He wore, during the journey, a black mask, and orders were given to kill him if he discovered himself In 1686, he was carried by Saint Mars to the isle of Sainte Marguerite, and, on the passage, the same precautions were observed as upon his first journey Saint Mars, having been appointed governor of the Bastile in 1698, carried the prisoner with him there, but still masked Here he remained till his death, on the 19th of Nov, 1703, treated with the utmost respect, but closely watched, and not permitted to take off his mask even before his physician He was buried on the 20th of Nov, in the cemetery of St Paul, under the name of Marchiali

☞ Notwithstanding the appellation given him the mask he wore was not of iron, but of black velvet strengthened with whalebone and secured behind the head with steel springs or as some assert by means of a padlock Many conjectures have been hazarded as to who this mysterious personage could have been One opinion is, that he was a son of Anne of Austria queen of Louis XIII, his father being Cardinal Mazarin (to whom that down-right queen was privately married) or the Duke of Buckingham Others suppose him to have been a twin brother of Louis XIV, whose birth was concealed to prevent the civil dissensions in France which it might one day have caused The latter view was adopted by Voltaire, in common with many others It has more recently been surmised that Lauzun was the mask but M Delort and the Right Honorable Agar Ellis (afterward Lord Dover) identify him with Count Matthioli, minister of Charles III Duke of Mantua This minister had been largely bribed by Louis XIV, and had pledged himself to urge the duke to give up to the French the fortress of Casale, which gave access to the whole of Lombardy But Louis, finding that Matthioli was playing him false lured him to the French frontier, and had him secretly arrested and imprisoned Being a minister plenipotentiary at the time, his seizure was a flagrant violation of international law which it was sought to be able to deny than to attempt to justify and the denial once made the honor of France was involved in upholding it This opinion is the one generally received at the present day by those who have investigated the subject

For what does the whole say but that man, despite all his follies and errors, led by a higher hand, reaches some bourn at last' *Goethe, Trans*

☞ "She is an elderly maiden, who, by some strange neglect on the part of mankind, has been allowed to remain unmarried This neglect might, in some small degree, be accounted for by the fact that her person and disposition came within the range of Mr Tappertit's epithet of 'scraggy She had various ways of wreaking her hatred upon the other sex, the most cruel of which was in often honoring them with her company and discourse

My thoughts naturally turned to Master B My speculations about him were uneasy and manifold — whether his Christian name was Benjamin Boswain (from his having been born in Leap Year), Bartholomew or Bill whether he could possibly have been kith and kin to an illustrious lady who brightened my own childhood, and I at come of the blood of the brilliant *Mother Bunch* *Dickens*

☞ "Now that we have fairly entered into the matrimonial chapter we must needs speak of *Mother Bunch* not the Mother Punch whose fairy tales are repeated to the little ones, but she who adorned when broken open reveals so many powerful love-spells It is *Mother Bunch* who teaches the blooming damsel to recall the fickle lover, or to fix the wandering gaze of the cautious swain, attracted by her charms, yet scorning the utters of the parson, and dreading the still more fearful vision of the churchwarden, the constable the justice, the warrant, and the jail *Quar Rev*

Mother Cārey A name which occurs in the expression "Mother Carey's chickens,' which is applied by sailors to the *Procellaria pelagica*, or stormy petrel, a small oceanic bird vulgarly supposed to be seen only before a storm of which it is regarded as the harbinger According to Yarrell, the distinguished ornithologist, 'The name of 'Mother Carey's chickens' is said to have been originally bestowed upon the stormy petrel by Captain Carteret's sailors, probably from some celebrated idealising of that name Others regard the words as a characteristic English corruption of "*Mater Cara*" (that is, dear Mother), an affectionate appellation said to be given by Italian sailors to the Virgin Mary — the special patroness of mariners — for her kindness in sending these messengers to forewarn them of impending tempests, but this explanation is more ingenious than probable When it is snowing, Mother Carey is said by the sailors to be plucking her goose, and this has been supposed to be the comical and satirical form assumed by a myth of the old German mythology, that described the snow as the feathers falling from the bed of the goddess Holda, when she shook it in making it

2 The pretended writer or compiler of the collection of ancient nursery rhymes known as "Mother Goose's Melodies"

☞ This "Mother Goose" is not an imaginary personage, as is commonly supposed She belonged to a wealthy family in Boston, Mass, where she was born, and resided for many years Her eldest daughter, Elizabeth Goose, was married by the celebrated Cotton Mather, on the 8th of June, 1715, to an enterprising and industrious printer by the name of Thomas Fleet, and, in due time, gave birth to a son Mother Goose, like all good grandmothers, was in ecstasies at the event, her joy was unbounded, she spent her whole time in the nursery, and in wandering about the house, pouring forth, in not the most melodious strains, the songs and ditties which she had learned in her younger days, greatly to the annoyance of the whole neighborhood, — to Fleet in particular, who was a man fond of quiet It was in vain he exhausted his shafts of wit and ridicule, and every expedient he could devise It was of no use the old lady was not thus to be put down, so, like others similarly situated, he was obliged to submit His shrewdness, however, did not forsake him he conceived the idea of collecting the songs and ditties as they came from his good mother-in law, and such as he could gather from other sources and publishing them for the benefit of the world — not forgetting himself Thus he did and soon brought out a book, the earliest known edition of which bears the following title 'Songs for the Nursery, or, Mother Goose's Melodies for Children Printed by T Fleet, at his Printing house, Pudding Lane [now Devonshire Street], 1719 Price, two coppers The adoption of this title was in derision of his mother in law, and was perfectly characteristic of the man, as he was never known to spare his nearest friends in his raillery, or when he could excite laughter at their expense

☞ "It is generally believed that *Munchausen* is only a *nom de guerre* Such, however, is not the fact It

is true that the 'Travels' published as his, though not by him were intended as a satire or parody on the 'Travels' of the famous Baron de Tott, but *Munchausen* was really in the habit of relating the adventures, now sanctioned by the authority of his mendacious name, as having positively occurred to him, and, from the frequency of the repetition of the same stories, without the slightest variation in their most minute points, he at length believed the narratives he had himself invented, and delivered them with as much *sang-froid* as if they had described nothing but so many probable events There was nothing of the *fanfaron*, or braggart, in his manner On the contrary, he was distinguished by the peculiar modesty of his manner and demeanor *New Monthly Mag*

☞ "This name [Pickwick] is no fabrication of our great novelist, and, indeed, very few of his names however happy however ludicrous, are so I have noticed a large proportion of them on actual sign boards in his own native county of Kent At Folkestone there is, or at least there recently was an excellent Mark Lapley — one, too who had been to America *Lower*

This is that despotism which poets have celebrated in the *Pied Piper of Hamelin*, whose music drew like the power of gravitation — drew soldiers and priests, traders and feasters, women and boys, rats and mice *Emerson*

☞ It has been remarked that the German *pfeifen*, to pipe, means, also, to decoy, to allure, to entice, to juggle, and that hence perhaps, is the origin of the Hamelin myth so far as relates to the children's being spirited away by a piper As all the mischief came from not paying the Tibicen Omnicolor his just dues, we have a curious illustration of our proverbial expression, "Pay the Piper," which may, indeed, have sprung from this story

Sir Andrew Ague cheek merely alludes to it as having been used by Olivia's clown upon an occasion of mirth and jesting, so that, in all likelihood, it was not intended to be taken seriously as a genuine name

Piers is represented as falling asleep on the Malvern Hills, in Worcestershire, and as having a series of dreams. In describing these, he exposes the corruptions of society, and particularly the dissoluteness of the clergy, with great humor and fancy, but considerable bitterness. An imitation of the "Vision," called "Piers Plowman's Creed," appears to have been written about the end of the 14th century. It is an exposition of the impediments and temptations which beset this mortal life. The method, like that of Bunyan's "Pilgrim's Progress," is allegorical, but the spirit of the poetry is not so much picturesque as satirical

Po lix'e nēs King of Bohemia, in Shakespeare's "Winter's Tale"

Po lō'ni ŭs Lord Chamberlain to the King of Denmark, in Shakespeare's tragedy of "Hamlet"

☞ "Polonius is the personified memory of wisdom no longer actually possessed. This admirable character is always misconceived on the stage. Shakespeare never intended to exhibit him as a buffoon, for, although it was natural that Hamlet — a young man of fire and genius, detesting formality, and disliking Polonius on political grounds, as imagining that he had assisted his uncle in his usurpation — should express himself satirically, yet this must not be taken as exactly the poet's conception of him. In Polonius, a certain induration of character had arisen from long habits of business, but like his advice to Laertes, and Ophelia's reverence for his memory, and we shall see that he was meant to be represented as a statesman somewhat past his faculties — his recollections of life all full of wisdom, and showing a knowledge of human nature, whilst what immediately takes place before him, and escapes from him, is indicative of weakness. In the great ever-recurring dangers and duties of life — where to distinguish the fit objects for the application of the maxims collected by the experience of a long life requires no fineness of tact as in the admonitions to his son and daughter — Polonius is uniformly made respectable" *Coleridge*

She is in love with Bassanio, but her choice of a husband is restrained by a whim of her deceased father, who deposited her picture in one of three locked caskets, of gold, silver, and lead, respectively, — with the testamentary proviso that her hand and fortune were to be bestowed upon that suitor only who should guess which of the caskets contained her likeness. Foreign princes, who come to try their luck, select the golden and silver chests, which contain nothing but death's head and a fool's head, with scrolls bearing mocking mottoes, but Bassanio fortunately chooses the "meagre lead," and wins his mistress. Soon after, his friend Antonio, a wealthy merchant, having thoughtlessly signed a bond in favor of Shylock, a Jewish usurer, by which he agreed to forfeit a pound of flesh in case of failure to repay by a stipulated time a sum of money which he had borrowed, and being unable, by a concurrence of unfortunate circumstances, to meet the obligation, Portia, in the disguise of a "young doctor of Rome," and under the assumed name of Balthazar, manages to have the case tried before herself and at last gives judgment against the Jew. Bassanio urges her to accept of three thousand ducats — the sum due to Shylock by Antonio — by way of remuneration, but she begs for a ring that she had once given him, and which he had sworn never to sell, or give, or lose. He begs to be excused from parting with it, but is finally over-persuaded, and lets her have it. P P, Clerk of this Parish The feigned author of a humorous and celebrated volume of Memoirs really written by Arbuthnot, in ridicule of Burnet's "History of My Own Times." The following extract will give a taste of this famous paper —

☞ "In the name of the Lord Amen. I, P P, Clerk of this Parish, by the grace of God write this history. Even when I was at school my mistress did me extol above the rest of the youth, in that I had a handsome voice. And it was furthermore observed that I took a kindly affection unto that black letter in which our Bibles are printed. Ever since I arrived at the age of discretion, I had a call to take upon me the function of a parish clerk, and to that end it seemed to me meet and profitable to associate me all with the parish clerks of this land — such, I mean, as were right worthy in their calling, and of becoming gravity. Now it came to pass that I was born in the year of our Lord Anno Domini 1653, the year wherein our worthy benefactor Esquire Bucfield add one bell to the ring of this parish. So that it hath been wittily said, that one and the same day did give to this our church two tuneful bells — its great bell, and its clerk

This name they corrupted or translated into *Prester John*, *Ung* being turned into "Jachanan," or "John," and *Khan* being rendered by "priest." His fame spread to Europe, and not only furnished the material of numberless mediæval legends, but supplied the occasion of several missionary expeditions to the East

Pretenders, The James Francis Edward Stuart, son of James II, and Charles Edward Stuart, grandson of James II, — called respectively the Elder and the Younger Pretender. By the forced abdication and flight of James II, in 1688, the crown of England passed to William, Prince of Orange (who was the son of Mary, daughter of Charles I), and to Mary, his wife (who was the daughter of James II, and consequently cousin to William). The Acts of Settlement, passed in the reign of William III (A. D. 1701 and 1708), secured the succession of the House of Hanover to the English throne. The Elder Pretender made some vain attempts to recover the kingdom, but surrendered his claims, in 1743, to his son, Charles Edward, the Younger Pretender, who, in the following year, invaded Great Britain from France, and fought gallantly for the throne of his ancestors, but was signally defeated at Culloden, in 1746, and compelled to escape to the Continent

St Christopher A saint of the Roman Catholic church Legendary writers place him in the third century, but critical historians reject him as imaginary, and regard his history as wholly fabulous His body is said to be at Valence, in Spain, he has an arm at Compostella, a jawbone at Astorga, a shoulder at St Peter's in Rome, a tooth and a rib at Venice, and many other relics, all enormous, at other places In art, he is represented as of gigantic stature, and usually as crossing a river with the child Jesus on his shoulder

Like the great giant *Christopher* it stands
Upon the brink of the tumultuous wave,
Wading far out among the rocks and sands,
The night-benighted mariner to save *Longfellow, The Lighthouse.*

☞ "To this title was attached the beautiful allegory of the giant ever in search of the strongest master, whom he found at last in the little child that he bore on his shoulders over the river Simplicity soon turned the parable into credited fact, and St Christopher became the object of the most eager veneration, especially as there had been a real martyr so called, and mentioned in the Muzarabic breviary, put to death in Lycia and whose relics were supposed to have been at first at Toledo, and afterward at St Denis The sight of his image was thought to be a protection from sickness, earthquake, fire, or flood for the rest of the day, and it was therefore carved out and painted in huge proportions outside churches and houses, especially in Italy, Spain, and Germany *Jones*

☞ "Who has not heard of St Patrick's Purgatory of its mysterious wonders, and of the crowds of devotees who have for ages been attracted by its reputed sanctity There it stands, with its chapels and its toll houses, and thither again yearly crowds of pious pilgrims who would wish to set out once for all to these holy shores, the accumulated sins of their lives *Brand*

When and by whom he was first styled *Saint*, or by what whim he was chosen to be the patron of the Democracy, does not appear.

☞ "The legendary *Satan* is a being whose distinct from the theological Lucifer He is never mobbed by the sullen dignity of the fallen angel No traces of celestial origin are to be discovered on his brow He is not a rebellious son who was once clothed in radiance, but he is the fiend, the enemy, evil from all time past in his very essence, foul and degraded, cowardly and impure his rage is ofttimes impotent, unless his cunning can assist his power Equally dramatic and poetical is the part allotted to Satan in those ancient romances of religion, 'The Lives of the Saints' But in the conception of the legendary Satan, the belief in his might melts into the ideal of his character Amidst clouds of infernal vapor he develops his form, half in allegory, and half with spiritual reality and his horns, his tail his saucer eyes, his claws, his taunts, his wiles, his malice, all bear witness to the simultaneous, yet contradictory, impressions to which the hagiologist is compelled to yield" *Palgrave*

☞ "Milton has carefully marked in his *Satan* the intense selfishness the alcohol of egotism, which would rather reign in hell than serve in heaven To place this lust of self in opposition to denial of self, or duty, and to show what exertions it would make, and what pains endure, to accomplish its end, is Milton's particular object in the character of Satan But around this character he has thrown a singularity of daring, a grandeur of sufferance, and a ruined splendor, which constitute the very height of poetic sublimity" *Coleridge*

2 Characters in an ancient English metrical romance having this appellation for its title

☞ A young Roman prince having rejected improper advances made by his step mother, the latter falsely accuses him of having attempted to offer her violence, and persuades her husband to order his death but the prince's instructors, the Seven Sages, preserve his life each telling the emperor, his father on successive days a story which as often induces him to delay the execution, though each night the queen counteracts the effect they have produced by telling a story which changes her husband's mind At the end of seven days the prince who has all the while abstained from speaking in obedience to information obtained by consulting the stars tells a story which leads his father to have the queen brought to judgment and put to death The romance of the Seven Sages is of great antiquity, and probably of Indian origin Versions exist in Arabic, Hebrew, Greek Latin, French, German, and other languages In English there are two metrical versions and also one in the humble form of a chap-book, under the title of The Seven Wise Masters

Seven Sleepers According to a very widely diffused legend of early Christianity, seven noble youths of Ephesus, in the time of the Decian persecution, who, having fled to a certain cavern for refuge, and having been pursued, discovered, immured in for a cruel death, were made to fall asleep, and in that state were miraculously kept for almost two centuries Their names as traditionally said to have been Maximian, Malchus, Martinian, Denis, John, Serapion, and Constantine The church has consecrated the 27th of June to their memory The Koran relates the tale of the Seven Sleepers, — deriving it probably from the same source as the Christian legend, — and declares that out of respect for them the sun altered his course twice a day that he might shine into the cavern

Here, however, we gladly recall to mind that once we saw him laugh, once only perhaps it was the first and last time in his life but then such a peal of laughter — enough to have awakened the *Seven Sleepers*! *Carlyle*

☞ By the Seven Sleepers are commonly understood Seven Christians of the third century of our era who were put to death for the faith of Jesus Christ The event happened at Ephesus, in Asia Minor, in the reign of the emperor Decius More than two centuries after toward the year 479 of our era, their bodies having been found in a cavern where they had been inclosed, they were taken out, and exposed to the veneration of the faithful The legend, in speaking of their death, and following the usual form, that they had fallen asleep in the Lord The vulgar took occasion thence to say that these holy martyrs were not dead, that they had been

hid in the cavern, where they had fallen asleep, and that they at last awoke, to the great astonishment of the spectators Such is the origin of the legend of the Seven Sleepers At Ephesus, the spot is still shown where this pretended miracle took place As a dog had accompanied these seven martyrs into their retreat, he has been made to share the celebrity of his masters, and is fabled to have remained standing all the time they slept, without eating or drinking, being wholly occupied with guarding their persons The Persians celebrate annually the feast of the Seven Sleepers, and their names are regarded as powerful talismans against the decrees of fate Their dog has not been forgotten, and, to recompense him for his zeal, he has been intrusted with the care of letters missive and correspondences, and admitted to paradise with the ram which Abraham sacrificed in place of his son, with the ass of Balaam, with the ass upon which our Lord entered Jerusalem upon the day of palms, and with the mare upon which Mohammed mounted miraculously to heaven *Bernard*

☞ "This [the vehement passion of Cressida] Shakespeare has contrasted with the profound affection represented in Troilus, and alone worthy the name of love, affection, passionate indeed, —swollen with the confluence of youthful instincts and youthful fancy, and glowing in the radiance of hope newly risen, in short enlarged by the collective sympathies of nature — but still having a depth of calmer element in a will stronger than desire more entire than choice, and which gives permanence to its own act by converting it into faith and duty Hence, with excellent judgment, and with an excellence higher than mere judgment can give, at the close of the play when Cressida has sunk into infamy below retrieval and beneath hope, the same will which had been the substance and the basis of his love while the restless pleasures and passionate longings, like sea waves had tossed but on its surface, — this same moral energy is represented as snatching him aloof from all neighborhood with her dishonor from all lingering fondness and languishing, recants, while it rushes with him into other and nobler duties, and deepens the channel which his heroic brother's death had left empty for its collected flood" *Coleridge*

Why, this I will say, made bold by thy example and caring nothing for what any body may think of it who does not in some measure, partake of thy nature, that he who created thee was the wisest man since the days of Shakespeare, and that Shakespeare himself, mighty reflector of things as they were, but no anticipator, never arrived at a character like thine" *L Hunt*

☞ "The second book gives a geographical description of the island the relations of the inhabitants in social life, their magistrates their arts, their systems of war and religion On the latter subject — which could hardly be expected from the pretext of the author — the most unbounded toleration is granted The greater part of the inhabitants believed in one Spirit, all powerful and all pervading, but others practiced the worship of heroes and the adoration of stars A community of wealth is a fundamental principle of this republic and the structure [is] what might be expected from such a basis *Dunlop*

☞ That he [Sir T More] meant this imaginary republic seriously to embody his notions of a sound system of government, can scarcely be believed by any one who reads it and remembers that the entirely fanciful and abstract existence there depicted was the dream of one who thoroughly knew man in all his complicated relations, and was deeply conversant in practical government *J H Burton*

Weller, Samuel Mr Pickwick's man, in Dickens's celebrated "Pickwick Papers" — designed as an epitome of London low life in its most agreeable and entertaining form He is an inimitable compound of wit, simplicity, quaint humor, and infidelity

☞ "The fat famed Sam Weller corresponds to no reality The Londoner born and bred is apt to be the driest and most uninteresting of beings All things lost for him the gloss of novelty when he was fifteen years old He would suit the museum of a *nil admirari* philosopher as a specimen, shrivelled and adust, of the ultimate result of his principle But Dickens collected more jokes than all the cabmen in London would utter in a year and bestowed the whole treasure upon Sam *Bayne*

Western, Squire A jolly country gentleman in Fielding's "History of a Foundling"

> There now are no *Squire Westerns* as of old,

Whittington, Dick The hero of a famous old legend, in which he is represented as a poor orphan boy from the country, who went to London, where, after undergoing many hardships, he attracted the notice and compassion of a rich merchant, who gave him a situation in his family as an assistant to the cook Here he led a miserable life, abused by the cook, and sleeping in the garret, which was overrun with rats and mice At length, having obtained a penny, he purchased a cat His master, shortly after, being about to send a ship to sea, gave all the servants permission to send a venture in her Dick had nothing to risk but his cat, and sent her The ship was driven to the coast of Barbary, where the master and chief mate were invited to court At an entertainment given to them by the king, rats and mice swarmed over the tables, and disputed with the guests possession of the banquet. The captain thereupon sent for Dick's cat, which, being produced, made a terrible havoc among the vermin, and was gladly purchased by the king at a very high price With the money thus acquired, Dick commenced business, and succeeded so well that he finally married his former master's daughter, was knighted, and became lord mayor of London This tradition has probably no foundation in fact, though there was a real Sir Richard Whittington, who was three mayor of London in the reign of Henry V

Wild, Jonathan A notorious English robber, who was executed in 1725 He is chiefly known to readers of the present day as the hero of Fielding's novel, "The History of Jonathan Wild"

☞ "In that strange apologue the author takes for a hero the greatest rascal, coward, traitor, tyrant hypocrite, that his wit and experience, both large in this matter could enable him to devise or depict, he accompanies the villain through all the actions of his life with a gimmal deference and a wonderful mock respect and does not leave him till he is dangling at the gallows, when the satirist makes him a low bow, and wishes the scoundrel good day *Thackeray*

☞ "It is not easy to see what Fielding proposed to himself by a picture of complete vice unrelieved by any think of human feeling and never by any accident even elevating into virtue, and the ascription of the fictitious adventures to a real character has in it something clumsy and unskilful on the one hand, and, on the other subjects the author to a suspicion that he only used the life of Jonathan Wild in order to connect his book with the popular known of that infamous depredator *H Scott*

☞ "It has been justly remarked by Mr Murphy that Fielding wrote the history of Jonathan Wild 'for a noble purpose and one of the highest importance to society' A satire like this strips off the spurious ornaments of hypocrisy shows the beauty of the moral character and will always be worthy the attention of the reader who does not rise wiser or better from the book he peruses *Roscoe*

His awe and apprehension having by degrees subsided, he ventured, when no eye was fixed on him, to steal a taste of the beverage which he had helped the strange man bring along. He repeated the draught so often that at length his senses were overpowered, and he fell into a deep sleep, which, strange to say, lasted for twenty years, though they seemed to him but as one night. Meanwhile remarkable events had taken place. His wife had died, his daughter was married, his former cronies were dead, or scattered, or much the worse for the wear and tear of time, and, more than all, there had been a war of revolution, the colonies had thrown off the yoke of the mother country, and were now known as the United States of America. Wizard of the North A name often given to Sir Walter Scott, in allusion to the extraordinary charm and descriptive power of his writings, which excited unbounded enthusiasm on their first appearance, and which still retain a large measure of their original popularity.

☞ Sir Walter Scott earned the title of 'Wizard of the North' by the magic power which reproduced Old Scotland, brought its battles remounted its steel-harnessed warriors, re-enacted its border feuds, repeopled its Highlands, restored the dark days of its Covenanters, revived its by-gone superstitions, raised Claverhouse and his troopers from the dead. The resuscitating wand was waved over other lands with like vivid effect. It caused England to re-appear from the days of Robin Hood to the days of George III., dispelled the mists that had settled on early France, and flashed light over Western and Eastern Europe from the clash of Saladin's ashy scimeter and the ponderous sword of Coeur de Lion. *Christian Examiner*

Yellow Jack Among sailors, a common personification of the yellow fever. Although used as a proper name, it is probable that the original meaning of the appellation was nothing more than *yellow flag*, a flag being termed a *jack* by seamen, and *yellow* being the color of that customarily displayed from lazarettos, or naval hospitals, and from vessels in quarantine.

2 A humorous and careless parson, in Sterne's famous novel of "Tristram Shandy," — represented as of Danish origin, and a descendant of the Yorick celebrated by Shakespeare.

☞ Yorick, the lively, witty, sensitive, and heedless parson, is the well known personification of Sterne himself and, undoubtedly — like every portrait of himself drawn by a master of the art — bore a strong resemblance to the original. Still however, there are shades of simplicity thrown into the character of Yorick which did not exist in that of Sterne. We can not believe that the jests of the latter were so void of malice prepense, or that his satire flowed entirely out of honesty of mind and mere jocundity of humor. *B. Scott*

Young America A popular collective name for American youth, or a personification of their supposed characteristics.

Young England A collective designation given some thirty years ago to a number of persons of rank and character, in England, who were engaged in a social movement, having for its aim the revival of the manners of mediæval times, which they held to have been greatly injured by the growth of a commercial spirit among the higher classes. Their cry was —

> Let wealth and commerce laws and learning, die,
> But give us back our old nobility. *Ed. John Manners*

☞ "Young England was gentlemanly and clean; its leaders being of the patrician order, and it looked to the middle ages for patterns of conduct. Its chiefs wore white waistcoats, gave red cloaks and broken meat to old women, and would have lopped off three hundred years from Old England's life, by pushing her back to the early days of Henry VIII. Some of the cleverest of the younger members of the aristocracy belonged to the new organization, and a great genius [B. Disraeli] wrote some delightful novels to show their purpose, and to illustrate their manner of how-not-to-do-it in grappling with the grand social questions of the age. Young England went out as soberly and steadily as it had lived. The select few who had composed it died like gentlemen, and were as polite as Lord Chesterfield in the act of death. Some of them turned Whigs, and have held office under Lord Palmerston, and others are Tories, and expect to hold office under Lord Derby when he shall form his third ministry." *C. C. Hazewell*

Young Eu'rope An association organized April 15, 1834, by delegates from the various national leagues, "Young Italy," "Young Switzerland," &c., on the basis of the political, social, and religious views advanced by Mazzini, and with the avowed design of exciting the nations of Europe to rise against their despotic rulers.

The other principal representatives of Young Germany were Karl Gutzkow, Heinrich Laube, Gustav Kühne, and Theodor Mundt. Its organization was broken up after the failure of the revolutionists of 1848-9.

Young Ireland A name adopted by a party of Irish malcontents, about the year 1840, who were in sympathy with the progressive movements instigated by O'Connell, — himself a member of the organization, — but who ridiculed his renunciation of physical force in seeking political reforms, and who were impatient to inaugurate insurrection and war.

Young Italy [It. *La Giovine Italia*.] The name assumed by an association of Italian refugees in France, who seceded from the "Charbonnerie Democratique," — a secret political union founded shortly after the Revolution of July, and which endeavored to make Paris the center of all political movements. The league was organized mainly at the instigation of Mazzini, who was dissatisfied with the contriving tendency of the Charbonnerie. It was instituted at Marseilles, — at that time the head quarters of the Italian refugees, — in 1830, and its object was to republicanize the peninsula. The motto of Young Italy was "Now and Ever," and its emblem a branch of cypress.

PRONOUNCING VOCABULARY

OF

SCRIPTURE PROPER NAMES.

BY WILLIAM A. WHEELER, M. A

REMARKS AND RULES.

THE pronunciation of the *Greek* and *Latin* proper names which occur in the Scriptures is governed by the same rules that determine the pronunciation of other Greek and Latin names (See p 1606) These rules, so far as they relate to syllabication and the sound of the vowels, are also generally observed in the pronunciation of the proper names derived from the *Hebrew*, but the true *accentuation* of these names can not now be ascertained, the original pronunciation of the Hebrew language having long been lost The usual course, therefore, has been to be guided by the corresponding Greek forms in the Septuagint But, in a multitude of cases, the Greek word is so different both from the Hebrew and the English as to afford no assistance in determining the proper place of the accent In such cases, regard must be had to analogy, general custom, euphony, the usage of the poets, and the authority of orthoepists It is, however, extremely difficult, in many instances, to decide upon the best pronunciation, and to preclude all doubt or diversity of opinion is obviously impossible

The course pursued in the following Table has been to give first that mode of pronunciation which is deemed to be best supported, and to subjoin, as an alternative mode, any other pronunciation which has, to any considerable extent, the sanction of present and reputable usage The names in the Vocabulary have been accented, divided into syllables, and marked in accordance with the system of notation employed in the previous part of this work The consulter will not, therefore, require any Rules to guide him to a correct pronunciation, but the few which follow — being short and easy to remember — may perhaps be of some use when he happens not to have the Dictionary at hand

RULES

1 In Hebrew proper names the letters have their usual English sounds, except in the cases specified below See PRINCIPLES OF PRONUNCIATION, p xli, *et seq*, especially with reference to final *a* unaccented (§ 11, p xliv), which is here marked ŭ, to point out the true quality of the vowel, and thus prevent the not uncommon error of sounding it like *a* or *ā*

2 Every final *e*, forming a distinct syllable, has its long sound, as, *Al-bĭsh'-ā ē, Lā'rē ē, Thŏm'o ē*

3 The vowels *ai* are sometimes pronounced in one syllable, as, *Hā'shai, Sā'nai*, and sometimes in two, as, *Sham'ma i, Bar-ad'a i* When pronounced in one syllable they should be sounded like *ai* in *aid* as, *Hā'shai, Sā'nāi* Some speakers choose to give them the diphthongal sound *aĭ*, or *ī*, but the practice, as Smart observes, is far from being common or established

4 The vowels *ei*, when followed by a consonant, form a digraph, and are pronounced like *ei* in *seize* as, *Ē'lon* When followed by a vowel, they are pronounced in separate syllables, and the *e* is generally sounded like consonant *y*, as, *Se-mē'us* (sē-mē'yus)

5 The vowels *ia*, following an accented vowel, are pronounced in one syllable, the *i* taking the sound of consonant *y* as, *Ban-na'ia* (ban-na'ya), *I-sa'iah* (ī-zā'ya), *Je-de'iah* (jē-dē'ya) In other cases, they are pronounced in separate syllables, and the accent is on the *i* as, *Sā'ri-a, Bē'ri-ah*

6 The letter *g* has its hard sound before *e* and *i*, as in the English words *get, give* as, *Gethsemane, Gilead Pelhaps*, in consequence of having passed through the Greek of the New Testament, is an exception, the *g* being sounded soft, like *j*, conformably to the usual English mode of pronouncing words derived from the Greek

7 *Ch* is pronounced like *k* as, *Chaldea, Enoch Rachel* is the only exception, the *ch* in this name being sounded like *ch* in *chest Cherub* (kĕ'rub) a city of the Babylonish empire, must not be confounded in pronunciation with *cherub*, one of an order of angels

8 Gentile names ending in *ite* (sing.) and *ites* (pl.), together with feminine nouns of the same class in *itess* or English formatives, and follow the accent of their primitives, as, *Ahm'mon ītes, Is'ra el ītes, Ca'naan-it ess* The same is true of gentile adjectives ending in *itish* as, *Mō'ab ī'tish, Mĭd'i an ĭt'ish* Gentiles in *ite* and *ic*, with their plurals are also Anglicized both in spelling and pronunciation, except *Mag'da le'ne*, which is commonly thus pronounced, as a classical word, the Anglicized form — which does not occur in the Scripture — being *Mag'da len*

II.—NAMES FROM THE ANGLO-CATHOLIC VERSION.

THE Roman Catholic translation of the Latin Vulgate into English, commonly called the Douay Bible, and originally published by the English colleges at Douay and Rheims (the Old Testament in two volumes at Douay in 1609 and 1610, the New Testament in one volume at Rheims in 1582), differs, in about 2150 instances, from the Common English Version of the Scriptures (translated "out of the original tongues," and first published at London in 1611), in regard to the orthography of proper names. The following list contains a selection of about 1200 of these variations, being all that present any difficulty of pronunciation.

There is no uniform or established usage among Catholic scholars in regard to the pronunciation of the proper names in the Douay Bible, and, such being the fact, it is evident that an authoritative standard is to be sought in an appeal to general principles alone. Some of the names are pure Greek and Latin, and must, therefore, be pronounced in accordance with the commonly received rules which determine our pronunciation of other words from those languages. Frequently, however, the translators have Anglicized the names to a greater or less degree, and, in cases of this kind, the corresponding names in the Common Version,—where the difference is not too great,—or the acknowledged analogies and tendencies of the English language, may be taken as guides to the correct accentuation. In a considerable number of names of this class, the proper seat of the accent is determined by the quantity of the penultimate vowel in Greek. In other instances, we have the recorded decisions or opinions of good prosodists or orthoepists, as Labbe, Walker, Müller, &c. Such, in general, are the principles on which the pronunciations given below have been determined, principles essentially the same as those adopted by Walker in his "Key," and carried out also in the former part of this Vocabulary. Great care has been taken to apply them with entire consistency and exactness, and it is hoped that the value of the result will prove to be not greatly disproportioned to the time and labor expended in the execution of the task.

RULES

FOR PRONOUNCING THE VOWELS AND CONSONANTS OF GREEK AND LATIN PROPER NAMES

It will be perceived by a glance at the following Table, that the indicated accentuation of the words, and their separation into syllables, prevent the necessity of inserting any thing here to guide to a correct pronunciation, except the rules for the sounds of the vowels and consonants

The notation of vowel-sounds which is used in other parts of the Dictionary has been omitted here, because the two principal marks employed in it, namely, the long and the short [¯ ˘], have universally obtained a very different significance, when applied to Greek and Latin words, from what they have in English, being used in the former languages to indicate *quantity* only, while in English they are simple signs of *quality* As Greek and Latin words which are long in quantity, are, in thousands of instances, short in quality, and those which are short in quantity are as frequently long in quality, it could hardly fail to produce confusion, if the signs of quantity were used, in a classical vocabulary, to indicate the quality of the vowels In a few classes of cases, marks have been applied to certain consonants, in order to prevent an erroneous pronunciation, as, for example, to *c* and *g*, when they have their soft sounds (like *s* and *j*) before *e*, *i*, or *y*, but are separated from the vowel by the division of the word into syllables, as in *Ag'e-le*, *Ag's-dæ*, &c For the most part, however, the aim has been to dispense with diacritical marks, and to rely on the rules for pronunciation, and on occasional references to these rules, for such assistance with respect to pronunciation as is not supplied by the accentuation and syllabication

In settling the place of the primary accent, which is the first and most important point in the pronunciation of a word, the aim, of course, has been to follow the ancient and simple rules, which direct, that in words of two syllables, the penult be accented, that in words of more than two syllables, the penult be accented if it is long in quantity, but if it is not long, that the antepenult be accented The place of the secondary accent has in all doubtful cases been determined by considerations of euphony alone The words have been divided into syllables, in accordance with the commonly received rules on that subject. The rules for pronunciation which are given below have been derived, in the main, from Walker Sometimes the language of Grant, or some other grammarian, has been preferred

RULES FOR THE VOWELS

1. ANY vowel at the end of an accented syllable, and *e*, *o*, and *u*, at the end of an unaccented syllable, have the long English sound, as, *Ca'to*, *Ce'crops*, *Di'do*, *So'lon*, *Cu'mæ*, *Me lis'sa*, *Mo-los'sus*, *Tu-lin'gi*, in which words the final vowels of the first syllables have the same sound as the corresponding vowels in the first syllables of the English words *pa'per*, *ca'dar*, *si'lent*, *co'lon*, *du'ty*

2 *A* ending an unaccented syllable has the sound of *a* in *fa'ther* or in *last*, as, *Ga bi'na*, *A-re'ne*, pronounced *Gah-bi'nah*, *Ah-re'ne*

3 *I* ending a final syllable has the long sound, as, *To'mi* At the end of initial unaccented syllables it varies, somewhat indefinitely, between *i* long, as *I-u'lus*, and *i* short (like *i* in *pin*), as in *I-ta'li-a* In all other cases, *i* ending an unaccented syllable has its short sound, as in *pin*

4 *U* is pronounced as *i* would be in the same situation

5 *Æ* and *æ* are pronounced as *e* would be in the same situation

6 If a syllable end in a consonant, the vowel has the short English sound, as, *Bal'bus*, *Del'phi*, *Cin'na*, *Mos'chus*, *Tus'cus*, in which the vowels have the same sounds as in the English words *man'ner*, *scl'dom*, *din'ner*, *scoff'er*, *mus'ter*

EXCEPTION.—*E* in final *es* is pronounced as in the familiar proper name *An'des*.

RULES FOR THE CONSONANTS.

7 *C* before *e*, *i*, *y*, *æ*, and *œ*, is pronounced like *s*, before *a*, *o*, and *u*, and before consonants, like *k*, as, *Ce'a*, *Cu'ri-o*, *Cy'prus*, *Cæ'sar*, *Cœ'li a*, *Ca'to*, *Co'cles*, *Cu'mæ*

8 *G* before *e*, *i*, *y*, *æ*, *œ*, or another *g* followed by *e*, has the sound of *j* before *a*, *o*, and *u*, and before consonants other than *g*, as above excepted, the hard sound, as in the English words *gave*, *gone*, as, *Ge'lo*, *Gi gan'tes*, *Gy gæ us*, *Ag'ger*, *Ga'bi i*, *Gor'gi-as*, *Sa-gun'tum*.

9 *Ch* has the sound of *k*, but it is silent before a mute consonant at the beginning of a word, as, *Chtho'nia*, pronounced *Tho'ni a*

10 *T*, *s*, and *c*, before *ia*, *ie*, *ii*, *io*, *iu*, and *eu*, preceded immediately by the accent, in Latin words, as in English, change into *sh* and *zh* But when the *t* follows *s*, *t*, or *x*, or when the accent falls on the first of the vowels following, the consonant preserves its pure sound, as, *Sal-lus'ti us*, *Brut'ti i*, *Mil ti'a des*, &c *T* in the termination *tion* also retains its original sound, as, *The o do'ti on*.

11 *S* has, in general, the sound of *s* in *this*. Final *s* preceded by *e*, or a liquid, has the sound of *z*

12 Initial *x* has the sound of *z*

13 Initial *ph* before a mute is silent, as, *Phthi'a*, pronounced *Thi'a* Initial *p* before *s* is silent, as, *Psy'che*, pronounced, *Sy'ke* Initial *p* before *t* is silent, as, *Ptol e-mæ'us*, pronounced *Tol-e-mæ'us*

14 At the beginning of words we frequently find the uncombinable consonants *mn*, *tm*, &c, as, *Mne-mos'y-ne*, *Tmo'lus*, &c These are to be pronounced with the first consonant mute, as if written *Ne-mos'y ne*, *Mo'lus*, &c

REMARK 1 The termination *eus*, derived from the third declension of Greek contracts in *ευς*, although usually made a single syllable in poetry, is resolved into two syllables in the Table This is also done by Walker and Trollope, and it is defended by Labbe and Carr. The other syllabication, by which *eus* has the sound of *use*, as in the noun *abuse*, is also given

2 With regard to words which occur so frequently in English use that they may be said to have become Anglicized, it should be stated that the Table aims only to give the classical pronunciation Every one must judge for himself whether or not it will seem like affectation or pedantry, in any given case, to be classically correct.

PRONOUNCING VOCABULARY

OF

GREEK AND LATIN PROPER NAMES.

THE abbreviations *Pne*, *F*, *K*, *Pe*, *Fac*, *S*, *Py*, *C*, *L*, *Lid*, *B*, *For*, *Sch*, *W*, *M*, and *Fr*, stand, respectively, for *Passow*, *Freund*, *Klotz*, *Pape*, *Facciolati*, *Smith*, *Pauly*, *Carr*, *Labbe*, *Liddell & Scott*, *Buschoff & Moller*, *Forbiger*, *Schiller*, *Walker*, *Muller*, and *Fryklin*. The titles of the works referred to are given on page 1606. The figures which follow certain words in the Vocabulary refer to corresponding Rules of Pronunciation, also on page 1606. The figure 6, for example, appended to *Abantes*, refers to Rule 6, which shows that the vowel in the last syllable has its long English sound.

ETYMOLOGICAL VOCABULARY

OF

MODERN GEOGRAPHICAL NAMES.

INTRODUCTORY REMARKS.

PROPER names of places are, for the most part, compound words. As the former or the latter part of the compound is often the same in different words, it has the appearance of a prefix or a suffix, and may be treated as such, as the prefixes *aber, ash, north, stone*, the terminations *bury, ham, ness, wick*. The following Index includes the principal prefixes, terminations, and formative syllables, especially those which are component parts of English names. Subjoined to the Index is a brief Alphabetical List of geographical names not included therein, giving their derivation and signification, so far as these could be ascertained. A great many names are necessarily omitted, their history and signification being altogether unknown. Many others are omitted, the etymology of which is either obscure or purely fanciful. Prominence has been given to the geography of America, and the principal Indian names of places, now in actual use, have been inserted, so far as it has been possible to arrive at their meaning with approximate correctness.

Valuable assistance has been derived, in the preparation of this Vocabulary, from Ingram's edition of the Saxon Chronicle (London, 1823), a Vocabulary of Geographical Etymology in Sullivan's Dictionary of Derivations (Dublin, 1851), Charnock's Local Etymology (London, 1859), Foster's Manual of Geographical Pronunciation and Etymology (London, 1860), Lippincott's Gazetteer of the World (Philadelphia, 1855), Gibson's Etymological Geography (Edinburgh, 1850), and from various other sources. Many of the translations of the Indian names here given have been furnished, and all of them examined, by Henry R. Schoolcraft, LL. D., and the Hon. J. Hammond Trumbull, whose high reputation and well known accuracy in whatever relates to the Indian languages, literature, and history, are a sufficient guaranty for the correctness of this portion of the Vocabulary. Information in regard to certain names of the same class has also been obtained from the Rev. Edward Ballard, Secretary of the Maine Historical Society.

PRONOUNCING VOCABULARIES

OF

MODERN GEOGRAPHICAL AND BIOGRAPHICAL NAMES.

By J. THOMAS, M. D.,

AUTHOR OF THE SYSTEM OF GEOGRAPHICAL PRONUNCIATION IN LIPPINCOTT'S GAZETTEER OF THE WORLD.

PREFATORY REMARKS.

THE system adopted in the following Vocabularies — now generally acknowledged to be the only rational and satisfactory one for the pronunciation of geographical and biographical names — is, to pronounce all names as nearly as possible as they are pronounced by the educated people of the respective countries to which they belong, excepting only those few well known foreign names which appear to have acquired an established English pronunciation, such as *Paris, Naples, Florence, Venice, Milan, Munich*, &c

It is admitted that cases not unfrequently occur, in which it is impossible to convey with any great degree of precision the native pronunciation of other countries by means of English letters, but much is undoubtedly gained by such an approximation to the true sound as is within the reach of even the mere English scholar, since this would enable him more readily to understand, and to be understood by, those who are familiar with names as spoken by the inhabitants of the respective countries to which such names belong

But whatever weight may be allowed to this last consideration, it may be safely affirmed that the system above referred to presents, on the whole, greater advantages and fewer difficulties than any other which can be devised Some, indeed, have advocated the propriety of pronouncing foreign names as they are written, giving to every letter its proper English sound But such a method would obviously be attended with inextricable difficulties What, for example, would, on this system, be the proper English pronunciation of *Seine*? Should the *ei* be pronounced like long *e*, as in the words *seize, ceiling, receive*? or like long *a*, as in *vein, weight, inveigh*? or like *i* long, as in *height, sleight*, &c? Should *Seine*, then, be pronounced *sēn, sān*, or *sīn*? or should we sound the final *e*, and make it *sē'ne, sā'ne*, or *sī'ne*?

This one instance out of a multitude may serve to show the endless diversity and confusion into which such a system, or rather want of system, must necessarily lead But this is not all There are innumerable cases in which it is very difficult, if not impossible, to pronounce foreign names according to the English sound of the letters, — for example, *Guemgou, Hjelmar, Ignsne, Sugedin*, &c, — while there is no difficulty whatever in pronouncing them according to the native sound A multitude of instances also occur, in which the pronunciation according to the sounds of our language, though not difficult, is far less euphonious than the native pronunciation *Bacchiglione, Cagliari, Minho*, and *Saldanha*, may serve as examples Another strong argument against pronouncing foreign names according to the English sound of the letters, is furnished by the fact that in a great number of instances the same name is written variously In Spanish, for example, *x* and *j* (and *g* before *e* or *i*), having exactly the same sound, are sometimes used indiscriminately, more especially in the spelling of proper names Hence we have *Xalisco* and *Jalisco, Xalapa* and *Jalapa, Ximenes* and *Jimenes*, the two spellings in each instance being pronounced in Spanish exactly alike The following name is written in three different ways, — *Xiona, Jyona*, and *Gyona*, — all pronounced alike — *he-ho'na* What could be more perplexing, or more absurd, than to call such a name sometimes *zix-o'na* (*x* at the beginning of a word being pronounced as *z* in English), sometimes *ji jo'na*, or *je jo'na*, and sometimes *gi-jo'na*, or *ge-jo'na*?

In the preparation of these Vocabularies, the aim has been to give them practical utility rather than great fullness or extent, accordingly, those English and American names (such as *Franklin, Johnson, Thomson*, &c) of which the pronunciation could scarcely be mistaken, have generally been omitted, and the space thus gained has been filled with the more difficult names of other countries.

In giving the pronunciation of geographical and biographical names, perhaps the most important, and certainly the most difficult, point of all, is to mark the *accent* correctly In all the principal languages of Europe there is not one general rule for accent that can be implicitly relied on So great is the uncertainty in this respect, that the most accomplished native scholars of Italy, Spain, and Germany are not unfrequently at a loss how to accentuate the proper names of their respective countries, particularly if the name in question happens to belong to some obscure or remote district And if it is so difficult to determine the correct accentuation of the names that occur in a single language, the intelligent reader may judge how arduous must be the task of ascertaining the proper accentuation of the endless variety of names found in the different European languages In fulfilling this task, information has been sought from every accessible source, and especially from educated natives, not only of the different countries, but of different sections of the same country With respect to the pronunciations contained in the following Vocabularies, it is believed that they will be found to be as minutely exact as they could with propriety be given in a work designed chiefly for the use of the mere English scholar Particular care has been taken with what may be termed the four great languages of continental Europe (viz, the French, German, Italian, and Spanish), not merely to mark the accent correctly, but to represent, as far as possible, every important peculiarity of sound It is, however, scarcely necessary to observe, that no system of notation, based upon the sounds of the English tongue, can represent exactly the pronunciation of words in other languages We have, for example, no sound precisely corresponding to what is perhaps the most common of all the French vowel sounds, that of *a* in *Amiens, Arago*, &c, since it is less broad than our *a* in *father* or *far*, and more open than the *a* in *mallet* or *fat* In this, and many other analogous cases, it has been deemed sufficient to strike the nearest approximation to the foreign pronunciation that the sounds of our language will enable us to do

With regard to English proper names, the difficulty is not in *representing*, but in *ascertaining*, the true pronunciation All those causes which operate in other languages to produce irregularity in accent or anomalies in the sounds of letters, would seem to prevail in a pre eminent degree in regard to English proper names Add to this that the same name is in many instances pronounced differently by different families, so that it becomes necessary not only to ascertain the pronunciation generally adopted by the best speakers, but also to attempt the far more difficult task of searching out the peculiar preferences, not to say caprices, of families, and even of individuals

The greatest pains have been taken by the author of the following Vocabularies to render them as complete and correct as possible The candid and intelligent critic will, of course, make due allowance for such deficiencies as are inherent in their character and necessarily limited extent Those who may feel a particular interest in such subjects are referred to the Introduction of Lippincott's Gazetteer of the World, in which the principles in regard to the pronunciation of foreign names are much more fully developed and explained, or to the Gazetteer of the World, recently published by Messrs A Fullarton & Co, of Edinburgh, in the Appendix to which the most essential part of the Introduction above alluded to has been embodied, with a frank and honorable acknowledgment of the source from which it was taken

The author can not conclude without acknowledging the valuable assistance which he has received from Mr William A Wheeler, who has for a number of years studied the subject of orthoepy, in its various branches, with great diligence and success.

ELEMENTS OF PRONUNCIATION

OF THE PRINCIPAL MODERN LANGUAGES OF CONTINENTAL EUROPE.

VOWELS

1 In the languages of Continental Europe, *a* never has a sound like that in the English words *fate* or *name*, but is usually like the *a* in *far* or *father*, often approximating that in *fat* In Hungarian it is sometimes like *o* in *not*

2 *E* generally has a sound similar to *a* in *fate*, or else to *e* in *met* In French it is often silent In Swedish, *e*, when long, has a sound resembling that of short *i*, but more prolonged Thus, *Carlen* might be pronounced *kar-lin'* When short, it is like *e* in *met*

3 *I* usually sounds as in *marine*, that is, like long *e* in English. It is sometimes like our short *i*, as in *pin* It is important to observe that *i* final in French, Italian, and Spanish, has the full, clear sound of *ee* in *see*; it should therefore not be allowed to fall into *i*, as it is apt to do in English or Anglicized words

4 *O* has for the most part nearly the same sound as in English Sometimes it is long, as in *no*, but often it has a sound intermediate between that of *o* in *no* and that in *not* (See Observation VI on p 1635) In Russian, *o*, when not accented, is very short, almost like *a* in *father*, or intermediate between this and that in *fat* In Swedish and Norwegian, at the end of a syllable, it is sounded like our *oo*

5 *U* in most languages is pronounced like the English *oo* In French (and in Dutch when it ends a syllable) it may be said to combine the sounds of our *oo* and long *e* If the speaker, after placing his lips in the position for pronouncing *oo*, endeavors, *without moving his lips*, to utter the sound of *ee*, that of the French *u* will be produced

6 *Y* is usually like *i*, that is, like our *e* In Danish, Norwegian, and Swedish it sounds like the French *u* or German *ü*. In Polish it resembles our short *i*, as in *pin* In Dutch it is like our long *i* It may be observed that, according to the modern Dutch orthography, *ij* is substituted for *y* Thus, the old spelling *Overyssel* is replaced by *Overijssel*, *Balderdyk* by *Balderdijk*, &c

DIPHTHONGS

7 *Aa* in Danish usually sounds nearly like our *a* in *fall*, sometimes approaching *o* long *Å* (*å*) in Swedish sounds like long *o* in English

8 *Ae* or *ä*, is usually pronounced like *a* in *fate*, or *e* in *met* In Dutch and Flemish *ae* sounds like *a* in *far* In the modern Dutch orthography *ae* is replaced by *aa* Thus, the name formerly written *Haerlem* is now *Haarlem*, *Maes* is changed into *Maas*, &c

9 *Ai* and *ay* are usually *proper* diphthongs, being compounded of the sound of *a* as in *far* and *i* as in *fig*, thus nearly corresponding in sound to our long *i* In French and Modern Greek they are pronounced nearly like *ay* in the English word *day* that is to say, like *a* in *fate*

10 *Au* has generally the sound of *ow* in *now* In French *au* and *eau* have the sound of long *o* (See Remark III p 1635)

11 *Ei* and *ey* are generally *proper* diphthongs, uniting the sounds of *a* in *fate* and *e* in *me*, being similar to *ay* in *day* when this word is pronounced very full In German they are like our long *i*, in French, nearly like our *e* in *met*, or *a* in *fate*

12 *Eu* in French and Dutch has a sound nearly similar to *u* in the English word *fur*, but somewhat more prolonged This sound is intermediate between that of the English short *u* and that of the German *o* (See 14) Some orthoepists represent the sound of the French *eu* by the German *ö*, but this latter sound is perhaps even more difficult for the English pupil than that which it is intended to explain It has, therefore, been deemed preferable, in the present work, to represent the French *eu* by an English sound, which, in the opinion of some accomplished French teachers, is nearer to it than the German, and which has the additional recommendation of being a sound with which the English learner is already familiar In German *eu* and *äu* have the sound of *oi* in English

13 *Ie* at the end of a word is always pronounced in French like *e* in the English word *me* In German it is frequently so pronounced In the middle of a word, *ie*, both in Dutch and German, always sounds like our long *e*

14 *Oe*, or *ö*, occurs in several European languages In Danish, however, instead of two dots being placed over the *o*, a mark is drawn obliquely through it (*ø*) The sound is unlike any thing we have in English, but is nearest to that of *u* in *fur*, or *e* in *her* If, while the lips are retained in the position proper for forming *o* long, the speaker tries to utter the sound of *e* in *met* (or *a* in *fate*), he will produce the sound of *ö* ☞ This sound, as well as that of the French *u*, should, if possible, be learned from an oral instructor In Dutch *oe* sounds like our *oo*

15 *Oi* in French is usually sounded like *wa*: *moi* is pronounced *mwa*, *toi*, *twa*, &c *Oi* in the termination of certain tenses of the French verbs, as well as in some adjectives, was formerly used instead of *ai*, and was pronounced like this diphthong Now, however, *oi* in such words is almost universally replaced by *ai* Thus, instead of *parlois* or *parloit* (the imperfect tense of *parler*, to speak), the French now write *parlais* and *parlait*, and instead of *François*, *Françoise* (French), they write *Français* and *Française*.

16 *Ou* in French and in Modern Greek sounds like our *oo*, in Dutch and Norwegian, like *ou* in the English word *now* or like *ou* in *house* In Portuguese it is pronounced nearly like long *o*

17 *Ue*, or *ü*, has the sound of the French *u* (See 5)

☞ Respecting the *double vowels*, see Observation V p 1635

CONSONANTS

The consonants in the languages of Continental Europe are, for the most part, similar in sound to the same letters in English The following exceptions may be mentioned —

18 *B* at the end of a word in German is pronounced like *p*. Between two vowels in Spanish its sound is somewhat similar to *v*, with which it is often interchanged, as, *Cordoba*, *Cordova*, &c This sound of *b* is formed by bringing the lips loosely or feebly into contact.

19 *C* before *e* and *i* in Italian is pronounced like *ch* in the English word *chill*, in the same position in Spanish it sounds like the Spanish *z*, or like our *th* in *thin* (except in the Catalan dialect, where it has the sound of *s*) In German, *c* before *e*, *i*, and *y* is pronounced like the German *z*, or like *ts* in English In Polish it has the same sound, even at the end of a word, thus, *Prypec* is pronounced *pripʻets*

20. *D* at the end of a word in German and Dutch is pronounced like *t* In Spanish and Danish, between two vowels or at the end of a word, it has a sound similar to *th* in *this*

21 In all the European languages *g* is hard before *a*, *o*, and *u*: in German, Danish, Norwegian, and Polish, it is hard in every situation, though it sometimes has a guttural sound Before *e* and *i* (or *y*), in French, Portuguese, Spanish, and Swedish, it is like the *j* of these languages In the same position in Italian it sounds like our *j*, or soft *g* In Dutch it is always pronounced like *h* strongly aspirated *Gn* before *e* and *i*, in French, Portuguese, and Spanish, sounds like *ny* hard.

22 *H* in French, Italian, Spanish, and Portuguese, is either never pronounced at all, or else is sounded so slightly that an English ear can scarcely perceive it In the other languages of Europe it has the same sound as in English

23 *J* in Italian, German, Polish, Swedish, Norwegian, Danish, and Dutch, is pronounced like our *y* In French and Portuguese it has the sound of *zh*, or *s* in the English word *pleasure* In Spanish it is equivalent to *x*, being similar in sound to a strongly aspirated *h*

24 Often at the end of a syllable, in French and Portuguese, *m* and *n* are said to have a nasal sound, but, more correctly speaking, dropping their own proper character, they impart nasality to the preceding vowels, which are then sounded through the nose For example, *ban* in French approximates in sound that indicated by *bŏng* in English *Alem*, or *alen*, in Portuguese is pronounced almost *a lĭng'* In pronouncing the nasal vowels in these languages, care should be used not to press the back part of the tongue against the palate, as is done in producing the sound of the English *ng* In French, *o* before *n* nasal has nearly the sound of our *o* in *note*, but is somewhat shorter That is to say, if the English word *no* be pronounced quickly, with the vowel rendered nasal, the sound produced will correspond almost exactly to that of the French *non* Some distinguished phonologists, however, are of the opinion that the sound of the French *o* in such cases is nearer to that of our *o* in *not* It is undoubtedly a nice and difficult question, but it is certain that *for practical purposes*, it is much safer to direct the pupil to pronounce the *o* with *n* nasal, like *o* in *no* or in *only*, rather than like *o* in *not*, since in the latter case he is in danger of confounding the sounds of the French *on* and *an* — a very prevalent fault with English and American speakers It should be remembered that *a* before *n* nasal in French is sounded very broad, nearly like our *o* in *not* *A* in Italian before *g* usually preserves its clear sound, hence *Marengo* is pronounced almost *mär-rĕn'go*, in all or nearly all the other languages, *n* in such cases approximates the sound of the English *n* in *final*

25 *Ñ* in Spanish (like *gn* in French and Italian, and *nh* in Portuguese) has a sound combining that of *n* and *y* consonant *Miño* and *Minho* are pronounced alike — *meen'yo*

26 *Qu* before *e* and *i* in Portuguese and Spanish, and before every vowel in French, has the sound of *k* In most other languages it is essentially the same as in English

27 *R* in most European languages is trilled more strongly than in English, particularly at the end of a word or syllable In pronouncing it, the tip of the tongue is made to approach very near to the roots of the upper teeth

28 *S* in many European tongues, when between two vowels, is very soft, having the sound of our *z*, or one very near it In German it is usually pronounced soft at the beginning of a word. In Hungarian it sounds like our *sh*, or the German *sch*

29 *T* in several European tongues has a sound somewhat more *dental* than in English This is especially observable in Spanish, in which language it is pronounced by putting the tip of the tongue against the upper teeth

30 *W* in German and some other languages is nearly similar to our *v* It may be described as a *v* uttered with the lips alone, without the aid of the teeth

31 *X* in Spanish generally sounds like a strongly aspirated *h* (See 23) In Portuguese it is pronounced like our *sh*

32 *Z* in German and Swedish has the sound of *ts*: in Italian, *z* usually sounds like *dz*, *z* like *ts*. In Spanish it is pronounced like the English *th* in *thin*

Combined Consonants.

33. *Ch* in Spanish has the same sound as in the English word *chill* (except in the dialect of Catalonia, where it sounds like *k*). In Italian, it is pronounced like *k*, in German, Polish, and some other languages, it has a guttural sound, somewhat similar to a strongly aspirated *h*. This sound must be learned from an oral instructor. In French (except in the case of some words derived from the Greek), and in Portuguese, *ch* has the sound of our *sh*.

34. *Cs* in Hungarian sounds like *ch* in the English word *church*.

35. *Cz* in Polish sounds like our *ch*, in Hungarian, like *ts*.

36. *Dy* in Hungarian blends the sounds of *d* and consonant *y*, and hence approximates the sound of our *j*. The same combination occurs in some English words, as in *soldier*, *verdure*, &c. (See 44.)

37. *Gh* in Italian is like *gh* in the English word *ghost*, or *g* in *game*.

38. *Gl* in Italian, when followed by *i*, has the same sound as *lh* in Portuguese, or *ll* in Spanish. (See 41.)

39. *Gn* in French and Italian (like *ñ* in Spanish) combines the sounds of *n* and consonant *y*. (See 2.)

40. *Gy* in Hungarian blends the sounds of *d* and *y* consonant. *Magyar* is pronounced möd'yŏr'. (See 36.)

41. *Lh* in Portuguese, and *ll* in Spanish, combine the sounds of *l* and *y* consonant. For example, *velho* is pronounced vel'yo, *villa*, vēl'yȧ, *llano*, lyȧ'no. *Ly* in Hungarian has also the sound of *ll* in Spanish. *Il* in French, when preceded by *i*, was formerly, in certain words, sounded like the Spanish *ll*, but according to the modern popular pronunciation, all sound of the *l* in such words is dropped. *Aurillac*, formerly ō'rēl'yȧk', is now generally sounded ō're'yȧk', *Bouillon*, formerly bool'yŏN', is now boo'yŏN', &c. It may be observed, however, that public speakers, and others who aim to be very correct in their pronunciation, still frequently retain the sound of the *l*.

42. *Nh* in Portuguese is pronounced like the Spanish *ñ*. (See 25 and 39.) *Ny* in Hungarian has the same sound.

43. *Sc* in Italian, before *e* and *i*, sounds like the English *sh*. *Scio* is pronounced shee'o, *Scortino*, shor tee'no, &c.

44. *Sz* in Hungarian is sounded like sharp *s*, or *ss*, but *zs* is like our *h* in Polish, *sz* sounds like our *sh*.

45. *Sch* in German is pronounced like *sh* in English; in Italian, before *e* and *i*, it sounds like *sk* in English, and in Dutch, before all the vowels, its sound is similar, but harsher and more guttural.

46. *Th* in all the modern languages of Continental Europe except Greek (in which the character Θ has the same sound as our *th*), is pronounced like simple *t*, or like *th* in the English word *thyme*.

47. *Ts* in Hungarian is like *cs* in the same language, that is, like our *ch* in *church*.

48. *Ty* in Hungarian blends the sounds of *t* and consonant *y*, it approaches in sound our *ch*. A similar combination of *t* with the sound of consonant *y* takes place in the English words *creature*, *righteous*, *virtue*.

ACCENT.

49. By *accent* is usually meant, in English, that particular impulse or stress of the voice which, in pronunciation, is placed upon certain syllables of a word: for example, on the last syllable in *confer* and *retain*, on the second in *America*, and on the first and last in *ever-more*. Many words in English (like the one last cited) have two accents, but one is always predominant, and is termed the *primary* accent; the other is called the *secondary* accent.

Something analogous to English accentuation is found in nearly all languages. In the Teutonic tongues, especially, the accent is essentially the same as in English, a large number of the polysyllabic words having both the primary and secondary accent, as *Sond'ers hau'sen*, *Zoll'ver-ein'*. It may be observed, however, that in none of the other languages, not even in the Teutonic, is the stress of voice thrown so exclusively on a single syllable as it mostly is in English, and, as a natural consequence, the unaccented syllables are almost invariably pronounced more distinctly than by us. This is an important point to be borne in mind by those who wish to speak foreign words or names correctly.

It is very difficult, if not impossible, to give any general rules, that would be of much practical utility, for placing the accent on foreign words or names. Among what may be termed the principal European languages (viz., English, French, German, Italian, Russian, and Spanish), there is scarcely one general rule for accent to which there are not a multitude of exceptions. Those of most general application are perhaps the following. In Spanish and Portuguese, words ending in a vowel usually have the accent on the penultima; those ending in a consonant are generally accented on the last syllable; yet even to these there are numerous exceptions, e. g., *Alcalá*, *Alcantara*, *Cordova*, *Guipuscoa*, *Mérida*, *Almodovar*, *Andujar*, *Caceres*, *Cadiz*, and many others.

50. In Spanish, the difference between accented and unaccented syllables, though sufficiently obvious to a native, is sometimes scarcely perceptible to a foreigner.

51. In Hungarian, there is no accent, according to our use of this word, but the syllables are distinguished from each other by *quantity*, being, like the Latin, divided into long and short. But as quantity in Latin and Greek is converted into accent by the usage of English pronunciation, so, in giving Hungarian names in the following vocabularies, the accent is placed according to quantity whenever this could be satisfactorily ascertained, e. g., *Csongrad*, chon-grȧd', *Uj-Var*, oo-e-vȧr'.

52. The French language also has no accent, in the sense in which we employ the term. The *marks* called *accents* that are placed over the different vowels, serve only to indicate some particular sound of these letters, and not that peculiar impulse of the voice which characterizes an accented syllable in the English and most other European tongues. Thus, the accent over the *e* in *parlé* serves to show that this vowel has its first French sound, and at the same time distinguishes it from *parle*, another form of the same verb, in which the *e* is mute. The circumflex imparts to the vowels over which it is placed a longer and deeper sound than ordinary, e. g., in *hâte*, *tempête*, *gîte*, and *apôtre*.

It is commonly said that the French pronounce all the syllables of a word with an equal stress of voice, but that they *seem* to an English ear to accentuate the last, because in our language the universal tendency is to throw the accent toward the beginning of the word. Others maintain that in pronouncing words of a number of syllables, the voice of a native French speaker almost invariably rises and dwells on the last, and that this peculiar terminal intonation is very analogous, and nearly equivalent, to our accent. Be this as it may, the fact that the English who have learned the pronunciation of names from hearing them spoken by the French themselves, almost invariably throw the accent on the final syllable, furnishes, it would seem, sufficient ground for establishing a general rule on this subject. Accordingly, the principal accent has been placed on the last syllable of French names; at the same time it has been thought proper to mark the others with secondary accents, in order to prevent them from being pronounced too slightly or indistinctly, as is usually the case with unaccented syllables in English. The pronunciation of *Orleans*, for example, has been thus given —or'lē'ŏN'.

OBSERVATIONS.

I. *I*, in French and some other languages, often has a sound that is sometimes said to be between our *ee* and short *i*. It is, however, properly the pure sound of *e* as in *me* or *ee* as in *see*, pronounced short. This sound is represented by ĕ.

II. It may be observed that *ā*, as in the English word *day*, when uttered fully and distinctly, is a true diphthong, consisting of a sound nearly like that of *e* in *there* or *met* (but less open), prefixed to (or combined with) that of short *a*. In pronouncing foreign names, *a* (used to represent long *e* in German, Italian, &c.) should never have this diphthongal sound, in other words, the terminal element, resembling short *i*, should be carefully excluded.

III. In making the pronunciation of foreign names, except where a full accent falls upon the vowel, we have usually preferred to use ā, ē (*or* ĕ), and ō, rather than *a*, *e*, *o*, as the speaker would be in danger of prolonging the sounds of the latter too much. In the pronunciation, however, of French names containing the improper diphthong *au*, *o*, marked long (o), is always made use of, because the sound in French is actually long, *in quantity*.

IV. *I* (not marked with a circumflex accent) in French is usually silent, and it is occasionally so in Danish and German.

V. A double letter, in foreign words, is generally to be sounded more distinctly and fully than a single letter of the same kind. This remark applies to nearly all the double vowels in foreign languages (except *aa* in Danish and Norwegian, already explained under the diphthongs, sec. 7, p. 1631), *ee* and *oo* in Dutch and German, *ø* and *øø* in Danish and Norwegian, being simply equivalent to the single vowel prolonged. *Ss*, except in Hungarian (sec. 28), has the sound of sharp *s*, as in our words *so*, *house*, &c. *Ss* is sometimes used at the beginning of a word or name by the Germans, in order to indicate more surely the sharp sound of *s* more especially in words from the Oriental languages are written in this manner since a single *s* in German at the beginning of a word would be liable to be sounded like our *z* (sec. 28).

VI. It will be observed that in the following vocabularies, *o* followed by a single consonant in the pronunciation of foreign names is usually without any diacritical mark (e. g., *Heilbronn*, hīl bron', *Pyrenol*, pē'rye nol'). In such cases the English scholar will, of course, pronounce it like short *o*, as in *folly*, this being perhaps the nearest English approximation to the true sound; yet, properly speaking, the sound approaches that of *o* in *nor*, and is, in fact, intermediate between *o* in *not* and *o* in *note*. This at least is true of the French, German, and Italian.* The reader should be particularly on his guard, in such cases, not to give the *o* a flat sound, as is too often done, so that *not* is pronounced almost as if it were written *nat*. Thus, in speaking English, is a very bad fault, but is still more objectionable in pronouncing foreign words.

VII. A system of notation intended to represent the sounds of many different languages, must, from the necessity of the case, be somewhat complex and difficult. Hence, it is particularly important not to embarrass the reader with needless signs or unnecessary distinctions. In respelling for pronunciation, therefore, marks on the vowels have generally been dispensed with, when the sounds of the letters could not easily be mistaken. Thus, for example, chär'pee gives the pronunciation of the Italian name *Carpi* no less perfectly, and more simply, than chär'pē, for the same reason far sis tän', as the pronunciation of *Farsistan*, is preferable to fär-sis tän'. It may be observed in regard to the example last cited, that the diacritical sign on the second *a* is necessary, otherwise the final syllable might be pronounced *stăn*: it has accordingly been retained. For

* In Italian this sound of *o* often differs very slightly from that indicated by ŏ (*o* intermediate), thus, *Giotto* might be pronounced jot'to or jŏt'to.

similar reasons, in giving the pronunciation of French names, the vowel *ending a syllable* is usually unmarked, except where the diacritical sign is absolutely required to distinguish the sound, as, *Chantilly*, shŏN′te′ye′, *Chamouni*, shăm′moo′ne′ A single e in these names is preferred to ee, because the latter would be apt to be prolonged too much In all cases, however, where it was thought that the omission of the diacritical sign might give rise to doubt or error, such sign has been added, inasmuch as practical utility has been deemed to be far more important than the mere show of consistency. For example, *es*, even when occurring under a full (or primary) accent, has been marked short (as in *Valdes*, val-dĕs′), because, in accordance with the usual Latin pronunciation, *es* is so apt to be sounded long, thus, we very generally hear *Cervantes* pronounced ser-van′tēz, although this is not a Latin name.

ʜ, small capital, has a sound somewhat similar to the preceding, but more resembling a strongly aspirated *h*

l (*l* liquid) is to be pronounced like *lli* in *million*; it blends the sounds of *l* and *y* consonant. (See 41 *)

ᴍ and ɴ, small capitals, are used to represent the nasal sound in French, being similar in sound to *ng* (See 24 *)

ñ is pronounced like *ni* in *minion*, it blends the sounds of *n* and *y* consonant (See 25 and 42 *)

ʀ, small capital, has nearly the sound of *rr* in *terror*, but stronger. (See 27 *)

ś is used to indicate that the sound of the *s* is very soft, nearly resembling our *z* In the middle of a word it should be pronounced like a soft *z*

w̆ has a sound similar to our *v* (See 30 *) The ˘ over the w is intended to point out its alliance to our *v*

y and *ey* at the end of an unaccented syllable sound like *ĭ* in *pin*

au and *aw* have the sound of *a* in *fall*

c̈ẗ indicates the clear sound of short *i* before *r*, as in the English words *spirit*, *miracle*, &c

ow is to be pronounced like *ow* in *cow*, and *ou* like *ou* in *house* In respelling for pronunciation, *ow* has been replaced by *ou*, wherever the former combination would be liable to be pronounced like long *o*, as in *grow*, *tow*, &c

ss is sometimes used to mark the sharp sound of *s* where a single *s* would be liable to be pronounced like *z*, e. g., *Mons*, mŏNss, not mŏNs.

g sounds like *j*

th is to be pronounced like *th* in *this*

☞ The primary or principal accent in any name is marked thus (′), the secondary or subordinate accent thus (′), as Pas′sa ma quod′dy

☞ The sounds of the marked letters are explained in the Vocabulary at the bottom of each page.

OBSERVATIONS

NECESSARY TO BE BORNE IN MIND BY THOSE WHO MAKE USE OF THE TWO FOLLOWING VOCABULARIES

1 Every letter or combination of letters occurring in the *pronunciation* of a word or name, is to be pronounced with its proper English sound, e g, *ch* is to be sounded as in *chill*, *g* as in *get*, &c *From not attending to this simple and obvious rule, many persons fail to pronounce names correctly, even while they have the pronunciation clearly and accurately marked before their eyes* Thus, che-wăh′wă is given as the pronunciation of *Chihuahua*; many, however, with this pronunciation before them, have called it she-wăh′wă, not considering that if such had been the true sound, it would have been so respelt *Chapala* is, in like manner, most improperly pronounced shă-pă′lă All persons desirous of speaking correctly should be careful to guard against this most vicious pronunciation

2 In the pronunciation of foreign names, particular care should be taken not to allow it to fall into the third or broad sound of this vowel — an error to which American and English speakers are very prone, it would be far better, generally speaking, to pronounce it like *a* in *fat* It has already been observed, however, that *a* before *n* nasal in French is broad, almost like *o* in *not* Accordingly, in the two following Vocabularies, *an* nasal is represented by ŏN

3 In pronouncing French words containing *on* nasal, the speaker should be careful not to give o its short sound, since this is not only incorrect, but is liable to confound the word with others entirely different in spelling and signification By this faulty pronunciation, *bon* (good) is sounded like *ban* (ban or exile), *bon* should be pronounced bŏN — almost bŏng. *Toulon* should either be entirely Anglicized (as *too′lŭn*), or else pronounced too′lŏN′ — almost too′lŏng′. For the same reasons, *eu*, in names not Anglicized, should have its distinct sound, like our *u* in *fur*, and not be confounded with the French *ou* or *u* There is no sufficient reason why the French names *Dreux* (druh) and *Drour* (droo), *Leure* (lᴇʀ) and *Lure* (lür), should not be distinguished from each other in pronunciation, as well as our words *groom* and *groom*, *cur* and *cure*

4 In the pronunciation of foreign names, the speaker should be careful to *pronounce all vowels, whether in an accented or unaccented syllable, distinctly, if they are not expressly marked as obscure*

5 When *h* (not small capital) occurs at the *end* of a syllable in the pronunciation of a name, it is not generally to be sounded. It is often used, for example, after u (representing the sound of the French *eu*), that the learner may not give this vowel the sound of *u* in *cube* or *rule*, as otherwise he would be apt to do

It may be remarked, however, that, in a very few instances, *h*, at the end of Persian or Arabic names, is distinctly pronounced in those languages, and has therefore been repeated in the pronunciation, e g *Nadir shah*, nā′dĭr shăh

6 It is to be observed that the number of syllables in the names of the two following Vocabularies is to be determined by the number of accents or hyphens, or of both together, thus dnyĕs′tęr, the Russian pronunciation of *Dniester*, must be pronounced, not dni ĕs′ter, but dnyĕs′tęr, the *ny* being employed to indicate the sound of the Spanish ñ, that is, the sound of *ni* in *minion*

7 The abbreviation *Syn* (Synonym, or synonymous with) indicates that the name to which it is affixed is either simply another spelling of the name referred to, or that it designates the same person or place.

* These figures refer to the elements of pronunciation given above.

Rem-It may be observed that *Sahara*, or *Sakra*, is the singular of the Arabic word signifying "desert." *Sahha'ra* is the plural of the same word. This latter accentuation is perhaps preferable when applied to the Great Desert, since this vast tract may be considered as in some sense divided into different parts (or deserts) by the various oases with which it is interspersed

☞ It should be observed that n in Russian corresponds to our t, being *never*, in any case, pronounced like the English *b*, therefore, *Sebastopol* is an incorrect spelling. With regard to the pronunciation of this name, it may be stated that not only the inhabitants of the town itself, but educated Russians every where, *invariably* speak it with the accent as above given. In England, Sevastopol is the common pronunciation, but Sevasto'pol is not unfrequently heard among persons of the highest education.

Wy-o′ming

☞ The correctness of this pronunciation is often called in question, because the poet Campbell pronounces the name Wy′o ming, with the accent on the first syllable. Thus accentuation is readily explained by the fact that Campbell was never in the United States, and having no opportunity of ascertaining the correct pronunciation of the name, he naturally placed the accent according to the general tendency of our language, that is, on the antepenultimate syllable

Akbar (äk′bĕr) (*Hindoo pron* äk′bŭr)

☞ Moore, who is usually very correct in his accentuation, in Lalla Rookh, places the accent on the final syllable of Akbar This is to be accounted for simply on the ground that he was unacquainted with the true pronunciation He was doubtless misled by the fact that in a multitude of instances Oriental names in *an* take the accent on the ultimate syllable. But the name given to the greatest of the Mogul emperors, like many other such appellations (as Shah Jahan, "ruler of the world," and Jhumgeer, "conqueror of the world"), is properly a complimentary title, being nothing more than the comparative and superlative of the Arabic adjective *Achar* ("great"), which, as every Arabic scholar knows, is äk′bĕr As a surname it signifies the "greatest," or "unrivaled," corresponding to the Latin *Maximus*, which was given as a surname to the greatest of the Fabii

PRONOUNCING VOCABULARY

OF

COMMON ENGLISH CHRISTIAN NAMES,

WITH

THEIR DERIVATION, SIGNIFICATION, AND DIMINUTIVES, OR NICKNAMES, AND THEIR EQUIVALENTS IN SEVERAL OTHER LANGUAGES.

INTRODUCTORY REMARKS.

THE design of the following Vocabulary is, in part, to supplement that of Modern Biographical Names In addition, therefore, to the English Christian Names which it embraces, and to their corresponding Latin forms, which are also given, the principal modern equivalents in actual popular use, or which have become familiarly known through literary associations, or which are, for other reasons, peculiarly important, have been included as far as practicable

From Christian names are formed, by contraction or corruption, many sobriquets or nicknames, and many diminutives Some of these acquire special interest from their use in the formation of surnames, others are confined to particular localities, others, again, are merely colloquial or fanciful In this Vocabulary, only those diminutives and nicknames are given which are well established or are etymologically important

With one or two exceptions only, no notice is taken of surnames used as Christian names, such, for example, as *Addison*, *Harley*, *Jefferson*, *Sidney*, &c

Careful attention has been bestowed upon the pronunciation In names from the modern languages other than the English, the same system of notation is used as in the case of the Modern Geographical and Biographical Names. See pp 1634 to 1636

In selecting the names, and in tracing their derivation and signification, use has chiefly been made of the following works 1 Heyse's "Allgemeines verdeutschendes und erklarendes Fremdworterbuch Zwolfte Ausgabe Neu verbessert und berechert herausgegeben von Dr C A F Mahn" (Hannover, 1859) 2 Ingram's edition of the "Saxon Chronicle" (London, 1823) 3 Camden's "Remains concerning Britain" (London, 1674) 4 Verstegan's "Restitution of Decayed Intelligence in Antiquities" (London, 1634) 5 Jones's "Proper Names of the Old Testament Scriptures, Expounded and Illustrated" (London, 1850). 6, Robinson's "Lexicon of the New Testament" (New York, 1850) 7, Smith's "Dictionary of the Bible" (London, 1863) 8 Nichols's "What's in a Name" (London, 1859) 9 Lower's "Patronymica Britannica" (London, 1860) 10, Various Registers, Directories, &c 11 Miss Yonge's "History of Christian Names" (London, 1863), an elaborate and very able treatise, which contains much information of great value not elsewhere accessible, and which has been of more service than any other single work.

USED IN

WRITING AND PRINTING.

THE following Table embraces all the principal abbreviations commonly made use of in English at the present day It also embraces a very few well-established and important contractions formed by the use of the apostrophe A list of the abbreviations actually employed in this Dictionary will be found on page lxxii, but these are repeated here for the greater convenience of those who consult the work It is to be observed that some abbreviations occur only in the middle of sentences, and are therefore always begun with a small letter, that others—as those standing for titles—are always printed in capitals, and that others, again, sometimes commence with a capital and sometimes with a small letter When two modes are in use, both are given in the Table, but it is impossible to lay down rules in this place that shall determine which is to be adopted in a given case When an abbreviation stands for a foreign word or phrase, of which the English explanation is a translation, such word or phrase is given within marks of parenthesis immediately after the abbreviation

' One equivalent of sulphur,—used in the same manner as the preceding, thus, $\ddot{F}e$ denotes a compound of two equivalents of sulphur and one of iron

☞ A dash drawn across a symbol having either of the foregoing signs above it, denotes that two equivalents of the substance represented by the symbol are joined with the number of equivalents of oxygen or sulphur indicated by the dots or commas, thus, $\dddot{F}e$ represents a compound of two equivalents of iron and three of oxygen, forming sesqui-oxide of iron

+ indicates, in organic chemistry, a base or alkaloid, when placed above the initial letter of the name of the substance, as, $\dot{M}$, morphine, $\dot{Q}$, quinine

☞ Every elementary substance is represented, in chemical notation, by a symbol consisting of the initial or abbreviation of its Latin name, as, H for hydrogen, O for oxygen, Ag (from *argentum*) for silver, and the like, each symbol, when used singly, always indicating a single atom or equivalent of the substance represented by it, thus, O stands for one atom or equivalent of oxygen, C for a single equivalent of carbon, and the others in like manner A compound body made up of single equivalents of its constituents is represented by the symbols of the respective constituents written side by side, as, HO a compound of one equivalent of hydrogen with one of oxygen, forming water. To express more than one atom or equivalent of a substance, a number is placed either prefixed to the symbol, or, more commonly, written after it, below the line, as, $_2O$, or O_2, two equivalents of oxygen

A secondary compound, as a salt, is indicated by writing the symbols of the constituent compounds one after another, with the sign + between them, the symbol of the base being always placed first, thus, $CaO + CO_2$ represents carbonate of lime A comma is frequently used instead of the sign +, commonly to express a more intimate union than would be expressed by that sign The period is also sometimes used to indicate a union more intimate than that denoted by the sign +, but less so than that implied by a comma A number written before the symbol of a compound designates a corresponding number of equivalents of that compound, as, $3\,SO_3$, three equivalents of sulphuric acid When the formula of the quantity contains several terms, those to which the figure applies are included in parentheses or brackets, to which the figure is prefixed, as, $3\,(CaO + SO_3)$, three equivalents of sulphate of lime *Miller*

☞ The Arabic numerals are so called because first introduced into Europe by the Arabs They were not, however, invented by that people, but were derived by them from Hindostan The characters were originally the initial letters of the Sanskrit names for the nine digits, *one, two, three*, &c., but have undergone considerable changes of form The cipher was originally a dot, used as a mere arbitrary sign to mark place or local value

In the Roman notation, when any character is placed at the right hand of a larger numeral, its value is added to that of such numeral, as, VI, that is, V + I, XV, that is, X + V, MD, that is, M + D, and the like I, X, and rarely C, are also placed at the left hand of other and larger numerals, and when so situated their value is subtracted from that of such numerals, as, IV, that is, V − I, XC, that is C − X, and the like Formerly the smaller figure was sometimes repeated in such a position, twice its value being in such cases subtracted from the larger, as, IIX that is, X − II, XXC, that is, C − XX, and the like Sometimes after the sign IↃ for D, the character Ↄ (called the *apostrophus*) was repeated one or more times, each repetition having the effect to multiply IↃ by ten, as IↃↃ, 5000, IↃↃↃ, 50,000, and the like To represent numbers twice as great as these, C was repeated as many times before the stroke I, as the Ↄ was after it, as, CCIↃↃ, 10,000, CCCIↃↃↃ, 100,000, and the like The origin of the Roman numeral characters is uncertain, and various explanations of them have been given It is generally supposed that they were originally arbitrary signs, for which the letters most nearly resembling them were afterward substituted They are now chiefly employed in dates, headings of chapters, upon the dials of time pieces, and the like The most usual forms in the above list stand first, those that stand after these being rare forms, or such as are only occasionally used.

R″ Radius in seconds of arc, equal to 206264″ 8
′, ″, ‴, &c Accents used to mark quantities of the same kind which are to be distinguished, as, a', a'', a''' &c, which are usually read a prime, a second, a third, etc, $a\,b'\,c'' + a'\,b''\,c + a''\,b\,c'$.

☞ When the number of the accents would be greater than three, the corresponding Roman numerals are used instead of them, as, a', a'', a''', a^{iv}, a^{v}, a^{vi}, &c. The accents are often written below also, as, $a_{,}$, $a_{,,}$, $a_{,,,}$, a_{iv}, a_{v}, &c

Figures, and also letters, are sometimes used for the same purpose, as, a^1, a^2, a^{23}, a^n, a_0, a_2, a_n, a_x, and the like

^{1}, ^{2}, ^{3}, &c Indices placed above and at the right hand of quantities to denote that they are raised to powers whose degree is indicated by the figure, as, a^1, that is, the first power of a, a^2, the square or second power of a, a^3, the cube or third power of a, and the like

☞ These signs are also often used to indicate the repetition of an operation, as, d^2x, d^3x, d^nx, &c, indicating that the operation of differentiation has been performed upon x two, three, four, &c, times As used to indicate powers, they are often preceded by the negative sign to indicate the reciprocal of the corresponding power, or an inverse operation, as, a^{-1}, a^{-2}, a^{-3}, a^{-4}, &c, which are respectively equivalent to $\frac{1}{a^1}$, $\frac{1}{a^2}$, $\frac{1}{a^3}$, $\frac{1}{a^4}$, &c.

sin x The sine of x, that is, of the arc represented by x In the same manner cos x, tan x, cot x, sec x, cosec x, versin x, and co vers x, denote respectively the cosine, tangent, cotangent, secant, cosecant, versed sine, and coversed sine of the arc represented by x

☞ This sign must not be confounded with the negative index designating the reciprocal of a quantity, which would be applied to a parenthesis inclosing one of these expressions, as, $(\sin x)^{-1}$, which is equivalent to $\frac{1}{\sin x}$.

A 1 The designation of a first-class vessel, in Lloyd's Register of British and Foreign Shipping, the letter denoting that the hull is well built and seaworthy, and the figure the efficient state of her rigging, anchors, cables, stores, &c The figure 2 would imply that these were insufficient in quantity, or of an inferior quality. When a vessel has passed the age for the character A (four to fifteen years), it is registered A in red
Æ The designation of a vessel of the third class, fit to convey perishable goods on short voyages only.

M C Letters used to indicate that the boilers and machinery of a steam-vessel have been inspected and found to be in good order, and safe working condition
XX Ale of double strength.
XXX Ale of triple strength.

☞ The origin of the sign $ has been variously accounted for, but it is probably a modified figure 8, denoting a "piece of eight," i. e., eight reals, — an old

Spanish coin of the value of a dollar. It was in use long before the adoption of the Federal currency. The sign / is thought to have been originally a capital S (written thus, ſ), standing for the word *Shillings*. The character £, for Pounds sterling, is merely a capital *L* with a mark drawn across it, and represents the corresponding Latin word *Libræ*, while lb, or pound weight, is formed from the first and third letters of the same word, connected by a similar mark. The sign @ is a graphic modification of the Latin word *ad*, meaning *at*, or *to*, or perhaps of its first letter only. ℔ is another form of *p*, the initial letter of the Latin word *per*, by. % is a cursive variation of ÷, the sign of division; thus, six per cent may be expressed by $\frac{6}{100}$, or 6 ÷ 100, or, without indicating the denominator, 6—, whence, in rapid writing, 6½, or 6%. The other characters need no explanation.

VIII. MUSICAL.

Staff, the five lines with the four spaces between them, used to indicate the relative position of notes in the scale, as regards pitch.

☞ When these are not sufficient, other lines are added above or below them, according to the necessities of the case, and are called *leger lines*, or *added lines*. See LEGER in the Dictionary.

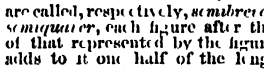
Bar

Double bars

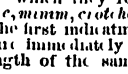
Bar, — the line drawn perpendularly across the staff to separate the notes into measures of equal or given lengths. Double bar, — used to mark the larger divisions of a piece, especially, in psalm or hymn tunes, songs, and the like, to mark the end of a verse or sentence.

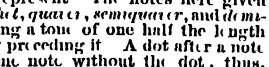
Close, — used to indicate the end of a composition, — often written

Notes, characters placed upon the lines or spaces of the staff, indicating, by their form and position, the length and pitch of the tones which they represent. The notes here given are called, respectively, *semibreve*, *minim*, *crotchet*, *quaver*, *semiquaver*, and *demisemiquaver*, each figure after the first indicating a tone of one half the length of that represented by the figure immediately preceding it. A dot after a note adds to it one half of the length of the same note without the dot, thus,

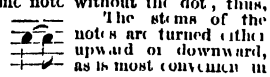


is equal to

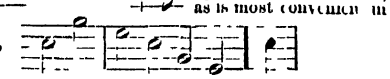


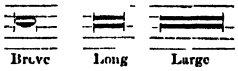


is equal to



The stems of the notes are turned either upward or downward, as is most convenient in placing them on the staff, thus,

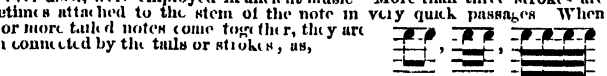




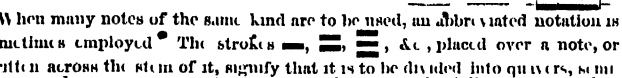
Breve Long Large

☞ Besides these, the *breve* was formerly used, it being twice the length of the semibreve, and is still occasionally used in chorals and similar compositions. Two other characters, the *long*, equal to two breves, and the *large*, equal to two longs or four breves, and the longest note ever used, were employed in ancient music. More than three strokes are sometimes attached to the stem of the note in very quick passages. When two or more tailed notes come together, they are often connected by the tails or strokes, as,

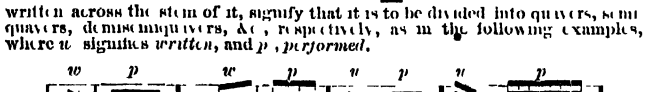
When many notes of the same kind are to be used, an abbreviated notation is sometimes employed. The strokes —, =, ≡, &c., placed over a note, or written across the stem of it, signify that it is to be divided into quavers, semiquavers, demisemiquavers, &c., respectively, as in the following examples, where *w* signifies *written*, and *p*, *performed*.



These marks are also used to direct the repetition of groups of notes preceding them in the same measure, as,



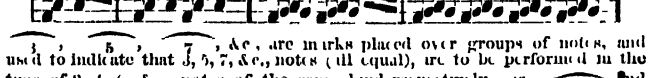
3, 5, 7, &c., are marks placed over groups of notes, and used to indicate that 3, 5, 7, &c., notes (all equal), are to be performed in the time of 2, 4, 6, &c., notes of the same kind respectively, as,



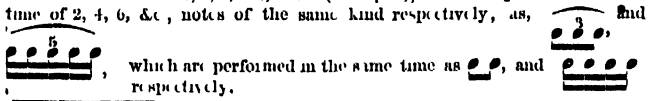
and

which are performed in the same time as

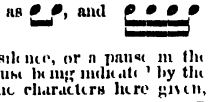
and



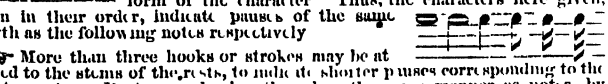
respectively.



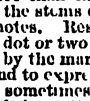
Rests, — characters indicating silence, or a pause in the performance, the length of the pause being indicated by the form of the character. Thus, the characters here given, taken in their order, indicate pauses of the same length as the following notes respectively.



☞ More than three hooks or strokes may be attached to the stems of the rests, to indicate shorter pauses corresponding to the shorter notes. Rests may be lengthened in the same manner as notes, by placing a dot or two dots after them. A rest, or pause of a whole measure, is indicated by the mark ▬ placed upon the fourth line, the figure 1 being written above, and to express a rest of two, three, &c., measures, a similar notation is used, or sometimes, for the larger numbers, a heavy stroke in the measure over which is written the number of measures included in the rest or pause. The following are examples.



G Clef.



F Clef.

G clef, — placed upon the second line, to indicate that every note upon that line is to be sounded as G of the natural scale, — called also *treble clef*. See CLEF in the Dictionary. F clef, — placed upon the fourth line, to indicate that every note upon that line is to be sounded as F of the natural scale, an octave lower than the F of the first space of the treble clef, — called also *bass clef*. See CLEF in the Dictionary.

C clef, — indicating that every note upon the line or space on which the character is placed is to be sounded as C of the natural scale, — called also *tenor clef*. This sign is not fixed like the preceding two, but may have four different positions on the staff. See CLEF in Dict.

Flat, — used to indicate that the note before which it is placed is to be sounded lower by a half step than the same note without the sign. When placed on a line or space at the beginning of a piece, it signifies that every note on such line or space is to be sounded lower by a half-step than in the natural scale.

☞ This character is a modification of the letter B, originally introduced to avoid the tritone, or sharp fourth, between F and B natural.

Double flat, — used to lower a note, already flatted, a half-step.

Single flat, as used after a double flat.

Sharp, — used to indicate that the note before which it is placed is to be sounded higher by a half step than the same note without it. It is applied in the same way as the flat.

☞ This character was originally designed to represent, by its four cross lines, the four commas of the chromatic scale. — The sharps or flats placed at the beginning of a piece to determine the key or pitch are called the *signature* of the piece. See SIGNATURE in the Dictionary.

Double sharp, — used to raise a note, already sharp, a half step.

Single sharp, as used after double sharp.

Natural, — used to contradict a sharp or flat, a previous ♯ or ♭ either expressed or implied.

, or

Repeat, — to mark a passage to denote that it is to be performed a second time. Sometimes the dots are placed also at the beginning of the passage. Heavy marks are occasionally added above and below the character, to enable the performer to distinguish the beginning or end of the passage to be repeated, or to call his attention to the repeat, as,

C, or

Characters marking common time, the former indicating two minims, the latter four crotchets in a bar.

Sign, — used to mark the point to which reference is made, or from which the repetition of a passage is to be.

, or

Appoggiatura, or leaning note, an embellishment consisting of a note placed before another note, one step or half step either above or below the latter, and usually taking half the time of the principal note, as,

An embellishment consisting of two appoggiaturas, moving by regular degrees to the principal note, as,

, or

Accacatura, — an embellishment very similar to the appoggiatura, but performed much more lightly and quickly. When written with a stroke across it, as in the second example, it is performed very quickly, being, as it were, driven into the following note.

A species of accacatura, — sometimes called *double accacatura*. It consists of two notes the first of which is the same as that over which the character is placed, and the second a step or half step above, as,

Turn, — indicating an embellishment consisting of the note over which the character is placed, the note above it, and the semitone below it, performed in quick succession, generally as a triplet, as,

☞ When the note above is flatted, the character is written ♭, when the note below is sharped, it is written ♯. It may also be written with the natural sign [♮] in place of either of these, when the corresponding note should have that sign placed before it.

Inverted turn, consisting of the same notes as the turn, performed in reverse order, as,

tr Trill, shake, — indicating that the note to which it belongs is to be rapidly alternated with the note above. A waving line (~~~) is often added after it, indicating how far the shake is to be extended, as,

See SHAKE in the Dictionary.

, or

Vibration, — indicating the rapid repetition of an emphasis upon the same note, as if three, four, or even a greater number of notes, somewhat staccato, were played instead of the note over which it is placed. It also sometimes denotes that the note is to be sounded in a tremulous manner.

Arpeggio, — used in piano music, to denote that the notes of the chord before which it is written are not to be struck simultaneously, but in quick succession.

Pause, or hold, — indicating that the note or rest over or under which it is placed is to be prolonged at the pleasure of the performer. It is sometimes placed over the *close*, to denote that the strain which it ends forms the conclusion of the piece, as

——— Organ tone, — indicating that the sound is to be evenly and uniformly maintained, that is, with a uniform loudness, — not often used.

< Crescendo, — indicating that the volume of sound is to be gradually increased.

> Decrescendo, diminuendo, — indicating that the volume of sound is to be gradually diminished

<> Swell, — indicating a gradual increase or crescendo followed by a gradual decrease or decrescendo

>< indicates a gradual decrease followed by a gradual increase of sound

> Sforzando, *or* Forzando, — indicating that the note or chord, over or under which it is placed, is to be struck with a force and an emphasis which are immediately diminished, — written also ∧, or ∨, or is indicated by the abbreviation *fz* or *sf*

☞ The marks ⊣, or ⊤, are also sometimes used with the same signification

< Pressure tone, — indicating that a sound begun soft is to be instantly increased to a loud tone

' Staccato, — placed over or under a note, to indicate that it is to be struck with force, and performed in a short, sharp, emphatic manner

• indicates that the note is to be performed in a manner similar to the staccato, but not so emphatically and sharply

☞ To indicate a still lower degree of emphasis and distinctness the slur is sometimes written over the dots as, ⌒⌒⌒⌒⌒⌒

⌒, *or* ——— Slur, tie — indicating that the notes over or under which it is placed are to be performed in a smooth, connected manner It is also used to connect two or more notes which are to be sung to one syllable, or to be united into one long note

} Brace — used to connect those staffs of a composition or score which are to be performed together

Direct, — placed on that line or space at the end of a staff, which is occupied by the first note of the following staff, to indicate the position of the latter to the performer It is now rarely used

♩ = 80, ♋ = 60, &c A notation used in indicating the proper time of a piece Thus, ♩ = 80, ♋ = 60, &c, denote respectively that 80 crotchets or quarter-notes, and 60 minims or half-notes, are to be performed in one minute, or that each note of the kind indicated is performed in the time of one vibration of the pendulum of a metronome, when the nut is set at 80 or 60, &c, respectively

✱, 𝄎, *or* 𝄏 Characters used in music for the piano forte, directing the use of the pedals The last two are less frequently used

∗, *or* ✱ A mark used after the preceding, and directing a discontinuance of the use of the pedals

△ indicates a phrase, or incomplete musical idea

⌐ indicates a section, or complete but not independent idea

☞ The ordinary marks of punctuation [, ;] are used by some composers instead of these three characters, or for a similar purpose

f Forte, with a loud sound

ff Fortissimo, with a sound louder than *forte*

☞ *fff* indicates a still louder sound, the loudest the voice or instrument is capable of producing

fz Forzando, *or* Sforzando, — indicating that the note is to be struck with force and emphasis, which are immediately diminished, the same as >, ∧∨, or *sf* It is also sometimes indicated by the letters *fp*

m Mezzo, with a sound of medium strength or loudness

mf Mezzo forte, with a moderately loud sound

p Piano with a soft or low sound

pp Pianissimo, with a sound softer than *piano*, but firm and audible.

☞ For an explanation of the various purposes for which these marks or points are used, see their names in the Dictionary The note of interrogation is said by Bilderdijk to have been formed from the first and last letters of the Latin word *Quæstio*, question, placed one over the other, thus, ⸮ According to the same authority, the note of exclamation was formed from the Latin word *Io*, joy, written vertically, thus, ¡ The circumflex accent (^, *or* ~) is formed by joining the grave and the acute The cedilla (¸) was originally the same as the letter *z*, and was written, in Spanish and French, between the letter *c* and a following *a*, *o*, or *u*, to preserve the *c* in its soft sound. Afterward it was placed under the *c*, and acquired the character of a mere diacritical point. The section mark, §, is said by some to have been formed from the initial letters (*ſſ*) of the Latin words *signum sectionis*, meaning *sign of the section*; but others assert that it is a corruption of a Greek π, the first letter of the word παράγραφος, which means *a marginal line* or *stroke* The character ¶ is a modification of a capital P (the initial of *paragraph*), the letter being reversed, and the black part being made white, and the white part black, for the sake of distinctiveness. The other characters are all purely arbitrary.

The science of geology, treating of the physical history of the globe, involves a description of the different strata which compose its crust, their order of succession characteristic forms of animal and vegetable life, &c. The principal subdivisions of geological time and the most important strata corresponding to each, with their relative positions, are indicated in the following diagram —

V ERA OF MIND, OR AGE OF MAN
